## **Extraordinary Council Agenda**

To deliberate on the 2021-2031 Long Term Plan

Wednesday 26 May 2021, 9.00am

Council Chamber, Albion Street, Hāwera

# Pūrongo Whaitikanga Governance Information

## Ngā Mema o te Komiti / Committee Members

Phil Nixon  
*Mayor*

Robert Northcott  
*Deputy Mayor*

Andy Beccard  
*Councillor*

Mark Bellringer  
*Councillor*

Gary Brown  
*Councillor*

Celine Filbee  
*Councillor*

Aaron Langton  
*Councillor*

Steffy Mackay  
*Councillor*

Jack Rangiwahia  
*Councillor*

Diana Reid  
*Councillor*

Bryan Roach  
*Councillor*

Brian Rook  
*Councillor*

Chris Young  
*Councillor*

## Apatono / Delegations

The Full Council's role is to carry out responsibilities under the Local Government Act 2002. It is the final decision-making authority within the Council and generally ratifies recommendations made by other committees. It is made up of all Councillors and the Mayor.

### Powers that cannot be delegated

The powers that cannot be delegated by the Council are:

- (a) the power to make a rate
- (b) the power to make a bylaw
- (c) the power to borrow money, or purchase or dispose

of assets, other than in accordance with the long-term plan

- (d) the power to adopt a long-term plan, annual plan or annual report
- (e) the power to appoint a chief executive
- (f) the power to adopt policies required to be adopted and consulted on under the Local Government Act 2002 in association with the long-term plan or developed for the purpose of the Local Governance Statement.
- (g) the power to adopt a remuneration and employment policy

## He Karere Haumarū / Health and Safety Message

In the event of an emergency, please follow the instructions of Council staff.

If there is an earthquake – drop, cover and hold where possible. Please remain where you are until further instruction is given.

## He Pānga Whakararu / Conflicts of Interest

Members are reminded of the need to be vigilant to stand aside from decision making when a conflict arises between their role as an elected member and any private or other external interest they might have.

# Rārangi Agenda

## Extraordinary Council Meeting

Wednesday 26 May 2021 at 9.00 am

Purpose to deliberate on the 2021-2031 Long Term Plan

**1. Matakore / Apologies**

**2. Whakaaetia ngā Menīti / Confirmation of Minutes**

- 2.1 [Extraordinary Council held on 17 May 2021 \(Day 1 of Submission Hearing\)](#)..... Page 6
- 2.2 [Extraordinary Council held on 18 May 2021 \(Day 2 of Submission Hearing\)](#)..... Page 20

**3. Pūrongo / Report**

- 3.1 [Adopt Dog Registration and Animal Impounding Fees for 2021/2022 Financial Year](#) ..... Page 30
- 3.2 [Deliberations on the Long Term Plan 2021-2031](#) ..... Page 34
- 3.3 [Appendix 1 –Management Comments on Submissions](#) ..... Page 40

# Matakore Apologies

---

**Leave of Absence:** *The Council may grant a member leave of absence following an application from that member. Leave of absences will be held in the Public Excluded section of the meeting.*

# Ngā Menīti Kaunihera Council Minutes

To	Extraordinary Council
Date	26 May 2021
Subject	<b>Extraordinary Council – 17 May and 18 May 2021</b>

(This report shall not be construed as policy until adopted by full Council)

## **Whakarāpopoto Kāhui Kahika / Executive Summary**

1. The Council is being asked to adopt the Extraordinary Council minutes of the meeting held on 17 May 2021 (Day 1) and 18 May 2021 (Day 2).

## **Taunakitanga / Recommendation**

THAT the Council adopts the minutes of the Extraordinary Council meeting held on 17 May 2021 and 18 May 2021 as a true and correct record.

# Menīti Minutes

## Ngā Menīti Kaunihera Whanokē Extraordinary Council Meeting

### Purpose to hear submissions on the 2021-2031 Long Term Plan

Council Chamber, Albion Street, Hāwera on Monday 17 May 2021 at 1 pm.

**Kanohi Kitea / Present:** Mayor Phil Nixon (Chairperson), Deputy Mayor Robert Northcott, Councillors Andy Beccard, Mark Bellringer, Gary Brown, Celine Filbee, Aarun Langton, Steffy Mackay, Jack Rangiwahia, Diana Reid, Brian Rook, Bryan Roach and Chris Young.

**Ngā Taenga-Ā-Tinana / In Attendance:** Waid Crockett (Chief Executive), Fiona Aitken (Group Manager Community and Infrastructure Services), Marianne Archibald (Group Manager Corporate Services), Liam Dagg (Group Manager Environmental Services), Sara Dymond (Senior Governance Officer), Gerard Langford (Communications Manager), Becky Wolland (Policy and Governance Manager), several members of the public and one media.

**Matakore / Apologies:** Nil.

Mayor Nixon explained that part of the meeting was being recorded for note taking purposes. The Mayor reminded the Councillors that the hearings were about listening to the submitters, asking questions and clarifying submission points.

#### 1 Tāpaetanga Tōmuri / Late Submissions

In moving the motion Councillor Beccard noted that all the information received were valuable.

#### RESOLUTION

(Cr Beccard/Cr Young)

**48/21** **THAT** the Council accepts the late submissions received from Vicki and Chris Koubaridis, Stephen and Gemma Comrie, Vick Koubaridis (Waverley Chamber of Commerce) and Peter Sullivan.

CARRIED

## 2 Kaitāpae-kōrero / Submitters – Speaker

### 2.1 Michael Carr – Sport Taranaki

The Council were commended on their Long Term Plan (LTP) specifically around physical activity levels. The statistics for youth in Taranaki were low therefore any initiatives relating to physical activity would be supported by Sport Taranaki.

Sport Taranaki welcomed the opportunity to hear the thoughts and views of the Council when the Regional Strategic Approach was being reviewed. Sport Taranaki wanted to be efficient, effective and sustainable in the future.

In terms of equitable fees and charges across sports codes particularly bringing regular field users into line with court based codes, Councillor Roach queried how Sport Taranaki envisaged this happening. Mr Carr found access costs were a barrier and this was an opportunity to undertake a review and look at making it more accessible for people.

Councillor Filbee sought Mr Carr's view on how important rural pools were in terms of the Learn to Swim Programme. Mr Carr explained that Sport Taranaki were continuing to build a regional aquatics assessment undertaking a regional assessment on every pool in Taranaki. A learning for Sport Taranaki was there were different solutions for different people. Rural isolation was something that needed to be considered and for him it came back to community need. Wellbeing and community were hugely important.

### 2.2 Andy Whitehead – Taranaki Coastal Community Board (the Board)

The Board was the most western ward of the South Taranaki District and as a Board believed it was vital to enhance the link between the Moana and the Maunga with improved walkways and cycleways. Rural communities relied heavily on road maintenance and signage to encourage people that it was worth stopping.

The Board supported the Environment and Sustainability Strategy encouraging the Council to take leadership with a focus on reduced waste opportunities at all Council events; the South Taranaki Business Park acknowledging the importance of the main centre being successful and encouraging new businesses as this benefited the wider community; and the Town Centre Master Plans with a key priority of protecting the users and the enhancement of the Manaia band rotunda and the connectivity of the Ōpunakē Beach to the town centre.

The Board also supported the Ōpunakē Beach Masterplan and encouraged the investigation of accessibility to the beach and suggested a change in gradient on the left side down to the beach. The Board requested that the budget to improve the discolouration of the water supply be brought forward; the reduction of one lane bridges, investment in roading in rural communities and footpaths in the town and an investigation into safe spaces for pedestrians; waterways; swimming pools and the suggestion for the Manaia Swimming Pool to be open one day a week for school tuition or adult use; signage; additional public toilets for freedom camper; playgrounds; and the retention of both the Manaia Town Hall and sports complex in Manaia as it was believed to be unfair to expect the community to choose a location for one facility.

### 2.3 Graham Young / Tumu Whakaae – Te Rūnanga o Ngāti Ruanui Trust (Ngāti Ruanui)

Ngāti Ruanui acknowledged the Council for their decision to introduce Māori wards as a bold step and one of many taken together as an enduring partnership was built for the future. The development of a Partnership Strategy was endorsed which was being developed in parallel with this LTP. In reflection of the above it was requested that the section in the LTP which described the Building Māori Capacity to Contribute to Council Decision Making Policy be renamed to show the true partnership and moved to the front of the LTP. Ngāti Ruanui requested the vision and community priorities renewed as the notation of Iwi/hapū in “Vibrant South Taranaki” did not reflect the active partnerships being developed. Ngāti Ruanui would like to look at an additional community priority that reflected the Council’s work with Iwi to date.

Ngāti Ruanui acknowledged the work undertaken to look at the best practical options for improving the wastewater plant for Hāwera however were disappointed that the LTP did not set out a more explicit road map for the chosen best practical option to improve the wastewater plant and to reduce if not eradicate the continued pollution of our ocean reefs systems from the combined ocean outfall with Fonterra. The Council needed to show its continued commitment to improve the wastewater treatment plant’s environmental performance. All work to date on sustainable matters and the focus placed in the LTP was for nothing if the Council remained one of the District’s biggest ocean polluters. Equally the Council needed to urgently address the constant failure of the York Street pumping station at Pātea, which allowed untreated waste to pour into the Pātea awa every year. This also occurred during heavy rain events. Ngāti Ruanui acknowledged the work being carried out at the site however it did not seem to help the issue.

Ngāti Ruanui requested the Council improve the safety of Pariroa Road which lead to Pariroa Pa where large numbers gathered throughout the year.

In response to the query around the relevance of Iwi/hapū under Vibrant Taranaki Mr Young explained that at the high level community priorities and vision the only mention was limiting on where Iwi fit. It was believed it should be a more sophisticated expression of the enduring partnership the Council had with Iwi across the region. Ngāti Ruanui acknowledged the partnership references and work to date however did not think the higher level, the first layer of vision and priorities articulated that well although acknowledged the Partnership Strategy later in the Plan.

In expanding on Pariroa Road Mr Young explained that the Pariroa Pā was a significant site that at times hosted 600 people. The road was narrow and safety was a concern. Ngāti Ruanui believed there was some priority work as part of the Roding and Footpaths Capital Projects Programme.

#### 2.4 Marie McKay – South Taranaki Museum Trust (the Trust)

There was a formal partnership with the Council with shared objectives. In 2018 the Trust sought support from the Council towards their new building and the Council granted \$200,000 however since then the quantity survey cost had risen. In 2020 the Trust appointed new architects who looked at options to reduce that cost. The Trust had raised \$1.4 million, the builders were ready, building consent was signed off and a fixed price contract was obtained. There was a \$40,000 shortfall however the Trust were confident that they would get this funding. The Trust had hit an obstacle with the Ministry for Culture and Heritage who sought the Trust to secure a partner that could underwrite the project as a condition of its grant. The Trust did not believe they would need to draw on that if something happened then their first response would be to reduce the scope of project and try to obtain funding elsewhere.

In terms of if the Trust had a documented plan about how the project could be downscaled should it be needed, Ms McKay explained that the architect held a list of items that could be removed without reducing their ability to gain compliance.

In response to the query around a further staged project Ms McKay explained that this was a single building already separated into three stages. Stage one was complete, this was Stage two and Stage three was filling the piece in the middle. The Trust had streamlined the building keeping it tidy the whole way through. It was a single building with a sprinkler system which was required for compliance.

Clarification was sought on the purpose of the building in Stage 2 which Ms McKay explained was for an exhibition, storage and a workshop however as it was a staged project in the initial stages it would be for storage and a workshop. It would not be open to the public until Stage 3 was completed.

In relation to the security of the treasures Ms McKay explained that this was the reason the building was first conceptualised. The Trust currently had collection in substandard storage and on offsite storage. It had always been their goal to get everything on one site.

Deputy Mayor Northcott commented that there was sufficient funding however the longer it was delayed the greater the chance the costs would increase. Ms McKay noted that there were two issues which was the escalating costs and the pressure on the construction sector causing contractors to move on if a contract was not signed. The Trust had secured a great builder at a great price and they did not want to lose that.

#### 2.5 Jesse Gooding – Federated Farmers - MS Teams

Federated Farmers were pleased with the performance of the Long Term Investment Fund (LTIF) and considered it should be sustained for the purpose to reduce rate increases and for funding debt. They saw the need for the revitalisation proposed for the Town Centre Master Plans however considered there to be a lack of detail and cost benefit analysis in the proposal. It was suggested that a more moderate draw down from the fluctuation reserve would be appropriate so supported option 2.

Federated Farmers conditionally supported the environment and sustainability proposals and the planting initiatives however requested funding be moved away from general rates. Their members had been encouraged to participate in the exercise to identify Significant Natural Areas (SNAs) however the Council were cautioned that those areas continued to be a natural asset and should not become a liability through an onerous regulatory process. They would like to work with the Council in the future. Regarding the carbon reduction or climate adaptation plans Federated Farmers supported the Council undertaking consultation with primary producers and to ensure the Council were meeting the carbon reduction objectives before imposing them on the community.

Federated Farmers supported the Business Park but considered a general targeted commercial rate would be appropriate to fund the small amount of debt repayments that would initially not be funded by the developer's financial contributions. In terms of roading and the identified issues around forestry in the Infrastructure Strategy Federated Farmers suggested a potential cost saving for several rural and urban rates payers if the Council looked at a targeted differential for forestry. They would be interested in talking with the Council to move forward if this was deemed appropriate.

Federated Farmers encouraged the Council to use the Uniform Annual General Charges (UAGC) to their maximum allowable extent which was 30% total rate revenue.

In expanding on the targeted differential rate for the logging industry Mr Gooding explained that it was a levy on the land identified as forestry land. At present forestry land was usually rated at the same level as dry stock. The capital value was generally lower and pine trees were not included in the capital value. This would involve taking that into account and putting an appropriate levy on the use of that property due to the cost that would be put on community of roads.

In response to the query around how other districts managed the issues, Mr Gooding understood there were no significant legal issue. He would like to understand what the difficulties were for South Taranaki.

Regarding the benefits in raising the UAGC to 30% Mr Gooding explained that it charged the people for the services being used on a user pays system. It meant that the cost was passed onto those who were using the service. This extended the user pays principal as much as possible.

## 2.6 Steve Francis – Sustainable Taranaki

Both imagination and dreams were needed to beat the climate crisis. The indicators and motivators were there to show the Council that the LTP needed to be more ambitious, transformational and innovative to make an impact on climate change. Was \$2 million over ten years sufficient to address climate urgency. The Council had the power to make positive changes and set out the things that could be done now to mitigate climate change and other pressing environmental issues.

Sustainable Taranaki encouraged the Council to empower management to look at everything through a climate lens by setting an ambitious and innovative climate policy and provide clear guidance about how it expected it to be implemented. There were several opportunities to help such as promote ride sharing apps like Link and be more innovative around urban planning requiring all new house builds to have their own source of renewal energy which would be investment for home builders that would pay for themselves. This was the same for new developments in town and the Business Park to ensure they embraced sustainability using sustainable products and modern energy sources and ensuring they were connected to sustainable transport links.

The Council had the power to use procurement to lead change, support local businesses, avoid transporting from far away and develop a procurement criteria that reflected climate and sustainability objectives. This would encourage suppliers to offer services to the Council and inspire other organisations, businesses and individuals to do the same.

Sustainable Taranaki supported the Council being more transformational in the Waste Management area noting that sustainable behavioural change was much easier for organisations like theirs when supported by local regulations. More could be done as employers to encourage change like car sharing, biking to work, subsidising e-bike purchases and encouraging remote meetings. Use their role as an investor to encourage change by reviewing the Long Term Investment Portfolio to remove unsustainable or fossil fuel based investments. There was so much that could be done without requiring more budget, this was a Long Term Plan thus its objective should be on long term plan costs and benefits.

As a community based organisation, they were there to help and support the Council with their experience and knowledge.

In response to the query around a facility like The Junction Zero Waste Hub in New Plymouth being opened in South Taranaki Mr Francis noted that if the Council supported and funded a separate centre then Sustainable Taranaki would provide the service of community engagement and education. Sustainable Taranaki had engaged someone locally in South Taranaki, he would like to work with the Council's Environment and Sustainability Manager to leverage that resource and engage volunteers.

Deputy Mayor Northcott queried the concerns Sustainable Taranaki had from the impacts the Business Park would have on the smaller towns. Mr Francis explained that this was around the 'Think Big' approach with a concentration of businesses in one area rather than supporting smaller communities avoiding the drift away from rural centres to one big hub.

In response to the query regarding the sustainability of Electrical Vehicles in the future Mr Francis explained that personally he did not consider electric vehicles the solution for transport. They were a transitory solution and ultimately people should be sharing and reducing.

## 2.7 Marie Dwyer – Kakaramea Hall and Alton Hall

Ms Dwyer spoke in support of increasing the District rural halls grant to \$80,000 to cover the rising costs for insurance and compliance for all halls. The insurance costs for Kakaramea Hall were \$4,200 and compliance for the fire extinguisher was approximately \$300 per year. She reminded the Council how much work the rural halls community did such as mowing lawns, maintenance and repairs and cleaning. The Hall was used four times a week by Scouts, Wrestling, Alton Army and Yoga and were available for the school during wet weather.

Councillor Filbee recognised the close proximity of the two halls and queried each hall's purpose. Ms Dwyer believed they served different needs for each community.

## 2.8 Mike Powell and Trustees – Hāwera Memorial Theatre Trust (the Trust)

Since the formation of the Trust in 2011 they had been involved with significant improvements in the Hāwera Theatre. The upgrade of the fire floor system which was unique and one of two in Taranaki. Apart from upgrading the Theatre the Trust raised money to provide sponsored use for the local performing art groups enabling them to perform on a stage in a theatre. This was hugely beneficial for the wellbeing and cultural depth of the community.

This year there had been several people wanting to use the Theatre and the Trust were proud to announce they had achieved a Plug and Play status which meant passing acts could book the Theatre, plug into the systems and run their show. The Hāwera Memorial Theatre was currently running at 57% compared with targets on other theatres to reach 47%.

The Trust were requesting funding to purchase an appropriate air conditioning system for the Theatre. There was a reasonable heating system for winter however in the summer months it reached high temperatures. The Trust had fundraised \$10,000 to engage an engineer to provide a report on the best system which was specialised but made the project shovel ready. However, the traditional funding sources no longer funded infrastructure upgrade in a theatre that was not owned by the Trust. In the event of a dissolution of the Trust all trust assets would go to the Council.

There was confirmation that there was potential for the Council to apply for funding for this.

In terms of the ongoing maintenance costs Mr Powell considered this to be the responsibility of the Council. The Theatre was a Council owned facility and the air conditioning would also be owned but the Council along with any ongoing maintenance and operational costs.

In response to the query around how much funding had been raised and if the Trust proposed to put funds towards the air conditioning upgrade Mr Powell explained that the Trust had raised approximately \$1 million over ten years and every cent had gone into either upgrading the Theatre or to sponsored use which was a big part of the Trust. The Trust were happy to do what was required however asked the Council to take leadership on this.

*The meeting was adjourned at 2.40 pm and reconvened at 3 pm.*

## 2.9 Ian Armstrong / Paul Roberts – Taranaki Trails Trust (the Trust)

The Trust believed Taranaki was an incredible region with the Taranaki Maunga and coastline and the stories and history that was in this part of world had a huge potential to create unique trails experience. The trails and journeys had the capacity to unite and connect communities and enrich the physical, mental and social wellbeing as well as create business opportunities and prosperity.

To date the Trust had spent a lot of time developing relationships with councils, community groups and Iwi as they acknowledged this could not be done alone and the community needed to be behind it. A website had been developed to market Taranaki as a trail's destination and a regional trail vision was being developed. There were a number of trails around Taranaki and this was an ambitious programme of development work. The Trust were exploring the feasibility of a great ride around the Maunga and also other options and trails that would be regionally significant linking district trails together.

The Trust were finishing the trails' vision then imbed that continued engagement especially with Iwi and hapū and work with them to achieve mutual goals and continue to explore the feasibility of a great ride.

In conclusion the Trust were requesting that the Council advocate for them with the work they were trying to achieve and would like to work with the Council on any trial development in South Taranaki.

In response to the query around what the Trust were actively doing to create the trails Mr Roberts explained that their key goal was the development of a great ride however until Iwi settlement not even a feasibility study could be undertaken. Mr Armstrong added that the Trust continued to build relationships.

Deputy Mayor Northcott queried how potential trails were identified as he believed the eastern hill country where there were Council paper roads would be ideal for mountain biking. Mr Roberts explained the Trust supported any group wanting to build a trail by sharing their knowledge and experience. Mr Armstrong explained that in conjunction with the Walking Access Commission they had developed a site Find my Adventure and trails were being located through GPS and put up on the site so anyone in NZ could locate them. The Trust would be interested in looking into a farm trail.

## 2.10 Ian Armstrong / Esther Ward-Campbell – Ōpunakē Loop Trail Trust (the Trust)

The Trust requested assistance with the following:

- Signage to mitigate safety issues on the Loop Trail.
- Diverting the track along the headlands from Middletons Bay around to the main beach away from the cliff which was requested by the Iwi for safety reasons. This land was Treaty of Waitangi Settlement land, and the land inside was Council owned. The Trust were fully supportive of what was being suggested however the boundaries were yet to be ascertained. The Trust would like this to be undertaken sooner rather than later.

- Development of a track on Hurst Park. The Hurst Park was given to the Ōpunakē community by the Hurst family on the conditions that it was developed into a park and it was accepted on that basis. There were some issues with contaminated land which the Council was aware of and there was a stream that might need to be planted and the Trust would assist with all planting and maintenance if this was to go ahead. Consultation had been carried out with the community as to what they would like and several good ideas had resulted.

The Loop Trail was almost finished except for Hurst Park. The Trust had sourced and planted 3,000 plants around the loop trail by a variety of community groups and individuals. Weed control had been an issue and the placement of wool carpet around trees had been effective however it was found that part of the carpet was not biodegradable and the Trust would like assistance to find an alternative option.

Mr Armstrong explained that at present some of the track and roadway along the headland was on Iwi and Council land and Iwi requested it be on Council land. The Trust already had an existing partnership with the Council with other areas so he did not consider this would be an issue. In terms of Hurst Park the Trust wanted the new track to go through Hurst Park for various reasons. There were two private owners involved who were extremely supportive.

In terms of timeframes Mr Armstrong explained that if the Trust could ascertain the funding then it would be undertaken in summer.

#### 2.11 Cedric Charles - Comac

Mr Charles supported the Council moving forward with the plan for the Business Park with urgency. Currently there was a lack of infrastructure making it difficult for business owners to find a site that did not require a large sum of money to be spent. He asked that the Council spend forward so that economic development could happen in Hāwera. Infrastructure was required on Kerry Lane across Waihi Road and back up Fitzgerald Lane as currently there was a storm water drain unable to be used due to its small size.

Councillor Filbee noted that there were several submissions proposing the Council defer some stages of the Business Park development and asked for his perspective. Mr Charles believed the question for the Council was where economic development sits in terms of their priorities. From his perspective businesses created businesses and a good business would add value to the District. He wanted prosperity for the District and community.

In response to the query around whether in his opinion the infrastructure proposed for the Business Park was sufficient Mr Charles was concerned that not enough emphasis was being placed on stormwater. He supported what the Council was doing in terms of the Business Park.

#### 2.12 Dion Luke (Advisor for Iwi Development) – Te Korowai o Ngāruahine Trust (the Trust)

The Trust were critical of the Environment and Sustainability Strategy (the Strategy) because the reference of the Treaty of Waitangi was simplistic. It was noted that the Resource Management Act was more appropriate and relevant to the Strategy given its focus of sustainable resource management, environmental protection and climate change.

In terms of the Building Māori Capacity to Contribute to Council Decision Making Policy the Trust acknowledged Council's support for Māori constituency as it was a significant commitment to building a strong relationship with the Iwi of South Taranaki. The Trust also acknowledged the draft Iwi-Council Partnership Strategy which was a positive step in identifying common goals and developing many horizontal partnerships.

Regarding Papakāinga the Regional Policy Statement for Taranaki provided a number of methods for local authorities to consider among those was to include in their District Plan provisions for the development of Papakāinga. Papakāinga development was a permitted activity in the District Plan for residential/rural and townships however what was missing was an objective for Papakāinga development. The Trust sought commitment from the Council to work together to identify the barriers and opportunities for Papakāinga and marae particularly in regard to the effects of the Three Waters Reform.

The position of the Trust on the Town Centre Master Plans was that they noted the significance of marae to the wellbeing of any uri that resided there. The Trust supported seeing the LTP include objectives and budgets for co-development of future town master plans with the community and hapū of those towns and establishing community gardens.

A focus for the Trust in terms of roading and footpaths for the next five years was to enhance kaitiaki amongst their uri. This would require safe, secure and legal access to the stream and coastal areas. Unformed legal roads presented an opportunity to reconnect uri to these places. The Trust would like to collaborate with the Council to identify which paper roads were appropriate.

### 2.13 Daniel Summerfield

Mr Summerfield commented that the proposed rate increase of 4% every year worked out to be a 50% increase over ten years. He considered this system to be unsustainable and believed rates should be kept at rate of inflation and no more.

The weekly waste collection was too large with bins being collected full weekly. This was the biggest source of litter pollution because on a windy day rubbish was spread contaminating the environment. This could be remedied by a lid latch. He suggested a bin half the size like being used in Ōpōtiki or proposed the current bins be collected biweekly. The target of reducing waste by 2023 was dismal and 50% could be done next week with smaller bins.

Mr Summerfield proposed that instead of spending \$95 million on water treatment that it be spent on helping to facilitate and subsidise water tanks for every house for watering gardens.

In response to the query around catering for larger families Mr Summerfield believed there were several options that could be investigated to reduce the amount of waste such as a bin size suitable for a larger household, lobbying for businesses to reduce packaging or a reduction in rates for business who committed to reducing their waste.

Councillor Filbee asked what Mr Summerfield would suggest the District could go without in order to achieve such a drastic decrease in rate. Mr Summerfield considered the town centre upgrades to be unnecessary apart from for those towns that needed it. He suggested minimal improvement be made like improvements to gardens and planting of grass.

#### 2.14 Des Thomas

In terms of the Environment and Sustainability Strategy Mr Thomas supported option 2 only undertaking what was required and leaving out actions 3 and 4. He believed it was questionable whether spending money on carbon reduction and sinks would achieve what was expected.

Mr Thomas supported the Business Park to allow businesses to grow.

Mr Thomas believed urban expansion needed to be made easy, he was aware of several developments in progress however he would like to see this area expanded. The town planning had forced rural housing out to Ketemarae and Turuturu Roads which in his opinion was not ideal. He suggested the Council should consider consolidating some of the areas where that obvious need was changing. Rural zones could be changed to make it easier to provide services and they could have different boundary restrictions therefore the section sizes could be reduced. Mr Thomas made suggestions on how the Council could help such as the Council approaching landowners to see if they were interested in subdividing or selling, provide loans and land security, use of the LTIF, easier terms for fees or the Council purchase land and develop it themselves.

There were various subdivisions currently in town. Councillor Beccard asked if this was sufficient which Mr Thomas responded that he would like to see more.

Councillor Rangiwahia asked if there was a place for the smaller sections in the town. Mr Thomas supported the idea however acknowledged that traditionally people in Hāwera preferred bigger sections.

#### 2.15 Vicki Monk

Ms Monk spoke in support of a community space in Ōpunakē for Kaumatua to gather for meeting and weaving where everyone was welcome to observe and learn. She preferred a space in the main street that was suitable for weaving and the nature of the process. Discussions around how an agreement would look would occur between Ms Monk and the building owner.

#### 2.16 Lauree Jones – Toimata Foundation

Enviroschools was formed in the 90s and was environmental education for sustainability and had a focus on social, cultural, economic and environmental sustainability. Across the country councils contributed 20% to 25% of the investment with so much more being put in on the ground. The Council had invested in Enviroschools in 2009/10 and again since 2015. Kindergarten Taranaki supported this 100% and all 24 kindergartens were Enviroschools.

In 2018 the Taranaki Regional Council took Enviroschools on as part of their commitment to their education delivery. The most proven model for success around Aotearoa was for 16 of their branches to be delivered through the regional council and then in school facilitation supported by the district councils. There were 15 of the 16 situations happening now.

Enviroschools were working with kindergartens through to secondary schools and were trying to work with clusters as well as helping the whole community. They provided various education around waste avoidance, how to live a low waste lifestyle, what a circular economy was, teaching people about locally sourced plants, what it meant to have great soil, when to harvest, how to cook it, preserve and save the seed and continue that cycle. It was unique to every social economic environment, age range and what was theming at that time. Walking alongside teachers and communities to help them increase their food resilience and their general community resilience. It was a long term holistic facilitated experience.

There was a message from Taranaki Regional Council (TRC) that if the Council invested additional funding into Enviroschools then TRC would dollar match that amount. It took \$50,000 to run this area and this had been undertaken through the TOI Foundation grant. If Enviroschools encompassed the weight list as well then 80% of South Taranaki would be enviroschools. Environmental focused schools that were creating environmentally future focused leaders. There was an opportunity for that person to be brought in house which would sit nicely in the environment and sustainability space.

#### 2.17 Mike Wren Trustees – Rotokare Scenic Reserve Trust

Rotokare was a free reserve open 24/7 to the public and one of their challenges from the start to increase their visitor numbers throughout South Taranaki which they had achieved. Their education programme dove tailed into enviroschools. In 2020 there were 1,196 school visitors despite COVID-19 not including early childhood education. There were 28 out of 32 South Taranaki schools involved in the education programme. The demand for the night tours exceeded their capacity to run them, there were over 400 people over 12 tours. During COVID-19 Rotokare in conjunction with TRC made backyard biodiversity videos which were watched by over 35,000 people.

Rotokare were contributing significantly to the District and appreciated the funding received from the Council annually. He did not support a contestable fund. The loss of their Manager had made them more aware that they needed resilience in their future and securing funding into the future would give them that protection and assurance.

Councillor Roach queried what the Trust's biggest problem was besides financial. Mr Wren commented that although the volunteer numbers were good this was unknown at any one time. Rotokare had several sponsors for projects however when the project ended so did the funding. The baseline of the funding from the Council would help them plan to upkeep their buildings and would provide a base for them to operate from.

Councillor Bellringer queried the possibility of the Trust charging for entry to generate income. Mr Wren explained that the Trust had considered various options however it believed the reserve was created through the generosity of the District and it was wrong to charge when themselves contributed to creating the reserve. The Trust did charge for some events such as the night tours and education programmes.

Councill Beccard had been involved in a transferring of a Kiwi and had the opportunity to release and name the Kiwi. He asked if there was an opportunity for these to occur more often. Mr Wren explained that this was a joint venture with Taranaki Kiwi Trust which was a separate financial entity.

2.18 Carol Curtis and Wendy Foreman – South Taranaki Neighbourhood Support (Neighbourhood Support)

Ms Curtis explained that Neighbourhood Support had received funding from the Council over the last three years which was used to pay their Development Coordinator, Wendy Foreman. Due to the changes in the rules around funding the future of the Development Coordinator was not secure however with the Council's assistance that position could be retained for longer allowing her to continue the good work done in the community.

During COVID-19 Ms Foreman contacted members which identified there were some people who were vulnerable. Last year Neighbourhood Support saw a growth of 6.4% in membership. This proved that what they did helped to create safer neighbourhoods and they were needed in the community.

In response to the query around the Family Fun Day and if any money was made from that Ms Curtis explained that this was an educational event for families to have fun, learn about safety and raise their profile. A bucket for donations and a small garage sale made a small profit of \$1,012. Stall holders were charged which made a minimal income.

2.19 Karen Cave and Sonya Douds – Eltham-Kaponga Community Board (the Board)

The Council were commended for their operating culture and supportiveness to enabling the Board to implement their roles.

The Board were pleased to see the fencing of the dog park at Taylor Park, Eltham getting underway with fence posts going in.

The Kaponga Municipal building was an eyesore in the town with water issues and the Board would like the Council to consider what the future of this building was. In consultation with the community it was apparent that there were a lot of people who had historical connections to that building. The Board supported the Council undertaking community consultation on this matter.

Eltham and Kaponga had great infrastructure and employment opportunities however had no space to grow with there being no available sections. The Board were asking the Council to step in and kick start this off.

Thoumine Park, Kaponga was an underestimated jewel for Kaponga however it required some attention. Some trees had been cleared however more clearing was required to enable the river to be seen. The access footpath to the river was unsafe and needed to be made more accessible to encourage people to use the area for swimming.

An increase of the budget for security camera maintenance was requested. The funding policy had not been inflation proofed and the current allocation was not sufficient to cover the cost.

The Board asked that the operational budget for parks and reserves be brought forward and some of the gardens planted with grasses and flaxes to make them more presentable.

In response to the query about the Kaponga Municipal building Ms Douds commented that she had consulted with the community and had received mixed feedback.

2.20 Wayne Bigham – Te Hāwera Community Board (the Board)

The Board supported the enhancement of the entrance of town from the South. The mural was great and well received by the public however the Board believed the next stage was enhancing the side of the bridge. The Board looked forward to working with the Council to achieve this.

Traffic flow in town was one regular comment Board members received from the community. There were three intersections (Princes Street and Glover Road, Turuturu and Glover Road and Waihi Road and South Road) that needed addressing to make them safe. The temporary roundabout placed on Turuturu Road and Glover Road showed the community what could be implemented, and the community were endorsing it. The Board would like the Council to advocate strongly for the intersections to be addressed.

**The meeting concluded at 5.15 pm.**

**Dated this                      day of                      2021.**

## Ngā Menīti Kaunihera Whanokē Extraordinary Council Meeting

### Purpose to hear submissions on the 2021-2031 Long Term Plan

Council Chamber, Albion Street, Hāwera on Monday 18 May 2021 at 9.30 am.

**Kanohi Kitea / Present:** Mayor Phil Nixon (Chairperson), Deputy Mayor Robert Northcott, Councillors Andy Beccard, Mark Bellringer, Gary Brown, Celine Filbee, Aarun Langton, Steffy Mackay, Jack Rangiwahia, Diana Reid, Brian Rook, Bryan Roach and Chris Young.

**Ngā Taenga-Ā-Tinana / In Attendance:** Waid Crockett (Chief Executive), Fiona Aitken (Group Manager Community and Infrastructure Services), Marianne Archibald (Group Manager Corporate Services), Liam Dagg (Group Manager Environmental Services), Sara Dymond (Senior Governance Officer), Becky Wolland (Policy and Governance Manager) and one media.

**Matakore / Apologies:** Nil.

#### 1 Kaitāpae-kōrero / Submitters – Speaker

##### 1.1 Jacq Dwyer – Pātea Community Board

The Board submitted on three points; restoration of the Pātea riverside that included pathways and walkways; Pātea Rugby and Sports Club and the statue of Kiwi the racehorse in Waverley.

The Council were thanked for being proactive with the restoration of the Pātea river with York Street improvements which enabled Waka Ama to launch the waka. Community feedback was positive. The Board asked that the Council consider the importance of the river when undertaking infrastructure work around Pātea; continue with the plans proposed; look at an expansion of the walkway; and the installation of a timber jetty/platform at the end of York Street which was an idea suggested by the local Iwi as a safe recreational area.

In response to whether there was an opportunity to work in partnership with Iwi to progress the idea, Ms Dwyer responded yes and believed it was another way to incorporate Māori art into the area. There was a turnaround area that could be upgraded and as a Board they could assist to make that happen.

In terms of Council owned sections in Pātea and Waverley, the Board queried whether this was worthwhile pursuing. Deputy Mayor Northcott commented that there were a number of sections on paper roads within the township of Pātea and considering the demand, the Board could undertake a feasibility study to determine whether some of the sections were able to be serviced, opened up and sold to alleviate this issue. Councillor Beccard noted that Infill housing was a good idea for the entire District.

The Pātea Rugby and Sports Club rooms on Surrey Street had now come to the end of its functional life. It had served 50 years and was completely built from voluntary labour. The proposed new building would be located where the Squash Club was and would incorporate several Sports Clubs overseen by one Committee. A feasibility study was undertaken and there was evidence of its need in the community. The Board and Pātea Rugby Sport Club endorsed the project and hoped the Council could assist in some way.

In response to the query around whether the Committee were in discussions with Sport Taranaki, Ms Dwyer confirmed this.

Councillor Rook queried the ownership of the current Squash courts. Ms Dwyer confirmed that this was Department of Conservation land who were supportive of the Pool so would no doubt be supportive of this proposal.

Deputy Mayor Northcott assumed that as part of the feasibility study there was acknowledgement that all of the multi sports and clubs were working toward this. The set up would be different with sports codes sharing a lounge, however it would be administered by the Committee which would comprise of members of each sports club. Any profits would go back into the building. The games would be managed to work together.

The statue of Kiwi the racehorse would be a tourist attraction for the own and it celebrated a piece of history. An information board would include images and the history around the statue. It would become a destination to get a photograph with like the Waka was for Pātea. The Board supported the project and feedback from the community was positive.

In response to the query around whether consideration had been given of casting it in concrete, Ms Dwyer explained that bronze would capture the detail and it was an enduring material which would last.

## 1.2 Jacq Dwyer

In terms of the rural hall grant, it was noted that there were 26 rural halls run by volunteers in the District, those volunteers worked hard to give the rural communities somewhere to create memories. The rising compliance costs made it difficult on a yearly basis to keep the bills paid. The upgrade to the Alton Hall had enhanced the heritage status of the building. The halls had to abide to fire compliance which meant every month the fire system would be checked which was \$12,000 a year and the insurance was being reviewed which would cost approximately \$4,000 a year. Fundraising was undertaken, however this was nowhere near enough. The facility was well used at a reasonable cost. Hard work was done to provide these halls for the communities to help with isolation and she supported increasing the halls grant to \$80,000 each year.

As Councillors queried the cost for checking the fire compliance, Council officers would investigate this further.

## 1.3 Viv Davy – Pasha Clothier – Creative Taranaki

Creative Taranaki represented around 220 individuals and organisations in Taranaki. The group was initiated in 2018 and in 2020 made a submission to the New Plymouth District Council Annual Plan about writing a regional strategy for arts, creativity and culture. When profiling their organisations, it was realised that Taranaki lacked a regional development organisation which meant there was no long term plan for arts, creativity and culture. Creative Taranaki were unable to access national funding for their projects.

A submission had been made to all three councils in the region as their vision was for a truly regional arts development organisation. They were looking at a head quarter in New Plymouth but were wanting part time offices in Stratford, Hāwera, Ōpunakē and Wāitara as well. If this was achieved, it would be the only Regional Arts Development that had regional offices. Through a survey they had received an overwhelming support for the organisation and the writing of a regional strategy.

Creative Taranaki were seeking to bring the district councils together to give it an organisation based on population. This would be how things were distributed in terms of commitments. They also believed the Taranaki Regional Council (TRC) had a role to play and should have some involvement in the project.

Creative Taranaki were wanting to boost the region and enable artists that were big on art that this was about building their capability and capacity to be sustaining in their capacity to contribute to the future of the region. As well as the cultural aspect by bringing them together. They would like to dove tail with the Councils Arts Coordinator.

Councillor Bellringer queried whether the proposed regional offices could be dove tailed into the Council's libraries which Mr Clothier agreed as they wanted to be integrated with the communities. There was a rationale for locating themselves in places that were already visited and attractive to people.

In response to the query around funding, Mr Clothier explained that they were looking at around \$30,000, however this figure would drop significantly if TRC contributed. The reception from the New Plymouth District Council was positive.

Councillor Young queried why national funding could not be obtained. Mr Clothier explained that a lot of the national funding was predicated on flowing through the regional arts development organisation. There were around ten and what was noticeable, was that this region did not have one.

In terms of what other organisations had achieved, Mr Clothier explained that Auckland played a leadership role amongst them and had achieved long term funding as well as a full range of projects in the community. It also did the capability workshops for artists in the community. They advocated for the inclusion of the arts in the council they were involved in. There was not a standard model of regional arts development agencies. They had a greater engagement with the Ministry of Culture and Heritage.

#### 1.4 Megan Dymond and Len Pentelow – Ōpunakē Community Emergency Group

In the past 20 years emergency events were a common occurrence and their family had experienced some of those events which she listed. Her reason for pointing these out was to remind everyone that they were happening more frequently and would continue to do so. It was believed that there was a 75% chance that the Alpine Fault would rupture before 2065 and Mount Taranaki was not far behind for a major event.

Ōpunakē had an emergency plan drawn up and put into action in 2016, however over the five years since, it had dropped away. Several residents from Ōpunakē and outlying districts along with previous members took up the challenge to revisit the plan into an updated, strong and efficient plan that covered outlying areas. The new group was named Ōpunakē Community Emergency Management Group (the Group) which was now full steam ahead. With support from TEMO and members of council they had a strong unified emergency group that all wanted the same thing, to make sure everyone was safe and had basic life essentials.

The Group had no funding to assist them with plans. They were in urgent need of funding for utility upgrades such as the installation of a generator plug at the Sandfords Event Centre which had been the assigned area for emergency events for some time.

The administration costs for such a group needed to be covered, equipment required updating such as first aid kits, batteries and PPE gear. The Group intended to apply for funding through other avenues if needed however, they felt emergency management should not be something groups need to seek funding for but, could be allocated an amount as part of council budgeting. Mrs Dymond supported the town centre upgrades for Ōpunakē and hoped that that the Group would be allocated some money to ensure safety and wellbeing.

In response to the query around the costings for a generator plug, Mrs Dymond confirmed it was close to \$10,000. She was still confirming that the Sandfords Event Centre was happy to be the assigned area and was waiting to get confirmation to have a generator plug installed.

#### 1.5 Len Pentelow - Ōpunakē Community Emergency Group

Mr Pentelow endorsed what Mrs Dymond presented in the previous submission. Funding would keep the organisation up and running. The Group had made a start, however a lot of training was needed to get a nucleus of people that knew what to do in an emergency event and who could make informed decisions.

In terms of the Taranaki Civil Defence, Mr Pentelow explained that they were moving away from overall control at the beginnings of an emergency emerging. His understanding was that in the first instance the local areas sorted it out and if it turned out to be more than they could cope with, then Taranaki Civil Defence would come into the picture.

The Council worked with TEMO and through that covered the whole region. There were officers here that worked with them as it was important to have people where people could communicate with when things go wrong on the ground.

Mrs Dymond noted that a concern raised at their meetings was the possibility of being cut off in a weather event. At times like that it would be up to the community and the Group to ensure everyone was safe and accounted for. Mr Crockett added that TEMO looked after those types of things during the initial stages if an emergency occurred, but then if it became a local matter Mr Dagg was the local controller that would run the process from a local district point of view. These positions were legislated.

Councillor Beccard had concerns that when TEMO were involved they preferred the local people to stand back. He asked if the Group had experienced this. Mr Pentelow felt that the Group were able to make informed decisions because they were the people on the ground. Mrs Dymond understood that there was training requirements that many of the volunteers had to go through. Some had already been through that training and were open to more. Those people were in the first instance collating information for Civil Defence and TEMO to forward that to them before they reached the area. The Group would accept volunteers however there would only be certain things they would be able to do.

*The meeting was adjourned at 10.29 am and reconvened at 10.47 am.*

## 1.6 Sonya Douds – Kaponga Progressive Group and Community

Ms Douds undertook some community consultation on the strategies and options. She had not received a lot of community feedback on the Environmental and Sustainability Strategy, however she supported this in a more aggressive way as she considered 5% to be a small target. She would like to see more education around composting and green waste and looking at the green waste fees. There was not a lot of feedback on the South Taranaki Business Park, however she supported Option 1. All development and growth supported everyone, so as Hāwera grew that filtered to the smaller towns. In respect to the town centre upgrades there was feedback around Kaponga being left out and no money was being spent in the town. There was support for Kaponga and any other smaller towns to be included in the next Long Term Plan. She would like to see the walkway from Kaponga to Hollard Gardens promoted in the walkway plan as a way to give them some recognition.

The town were grateful for the continued Council investment and support for their facilities, however there were some maintenance issues that needed to be addressed which were; the future for the Municipal Building; investigate the reason the upstairs in the Hall was closed off; wheelchair accessible toilets in the Hall; planting of regenerative trees and plant growth kept an eye on; tidying up of Thoumine Park; leak at the pool affecting the temperature; and improvements to the fence at Victoria Park.

Ms Douds was advocating for a mural depiction of the Battle of the Mountain Māori legend which was significant to Kaponga. Permission had been granted from the estate of Peter Gossage to use the culturally recognised images from this work. Next steps were to engage with Iwi and then work on implementation.

Currently Kaponga was an area of deprivation at the provision of the APNK link, which meant that youth were congregating outside the LibraryPlus which was situated on a dangerous corner. She supported the Council undertaking further enhancements to Victoria Park with shading and boosting the APNK which would provide a safe space for youth to go.

In terms of roading, Ms Douds would like to see the red 50km signs painted on the entrances of the town to reduce the speeds of traffic, lighting at the top end of Egmont Street, security cameras which was being worked on and an upgrade to the one lane bridge coming into Kaponga included in the Long Term Plan.

Community growth was a rising concern with no available section in Kaponga. It would be appreciated if affordable sections were opened up through new subdivisions. The walkway between Kaponga and Hollard Gardens was a jewel in the region. She looked forward to the playground review in the future.

In response to the query around speed limits Ms Douds explained that a lesser speed option would be considered. She added that the Kaponga Primary School were also concerned and supported a speed reduction in this area.

In terms of the proposed artwork by Peter Gossage Councillor Bellringer had concerns they were not portrayed correctly. Ms Douds explained that Peter Gossage had Iwi links to Taranaki. Iwi engagement would be undertaken to ensure the design was supported.

1.7 Sonya Douds – Kaponga Primary School (the School)

The School were concerned with the temperature of the pool. The primary contributor was several leaks resulting in the pool losing approximately 30cm in depth every day. Solar panels would assist with retaining the heat and would make it a suitable temperature for children to learn to swim. The cleanliness of the pool was poor which was due to the decrease in water each day and the filtering system was unable to work properly. With the increased use over the summer season lifeguards were needed for the entire season and to be open the full length of time which was until 7 pm. A locked area was also needed for the Schools swimming equipment as it was being used by the public resulting in items being broken or lost. Additional tables and umbrellas would be good. It was requested that the toilets be cleaned more regularly with more detail given to deep cleaning.

In terms of the solar heating that was once there, Ms Douds explained that it was installed to heat the toddler pool. The solar blankets would retain the heat and along with the fixing of the leak would keep at a reasonable temperature.

The leaks had been reported and Council officers were investigating this.

1.8 Nikki Watson – Bizlink Hāwera

Bizlink were asking the Council to extend the Bizlink membership boundary to incorporate those existing and future businesses that fell in the Business Park development. The following points were also raised:

- Supported the installation of a bike rack placed in or close to the town square which could house the Domino bikes.
- Work with the Council on ways to enhance the southern entrance more.
- The flow onto Princess Street from South Road as the main entrance turning into town and working with Waka Kotahi with this.
- Strongly advocating for a permanent roundabout on Glover Road and Turuturu Road.
- Introducing more electric car charging units in town.

In response to the query around if there had been any discussion with Dominos, Mrs Watson commented that this was a contentious issue and one that should have been discussed at the start, however this could be easily solved by installing a bike rack which would then encourage more cyclist into the town centre. This could be done in collaboration with nearby businesses who may make use of the facility.

In terms of the query around if there was sufficient parking in town, Mrs Watson preferred all parks to be taken away and people walked into the town centre. This was an opportunity to look build multi parking building.

In terms of whether there was enough space to remove some carparks away to put in electric car charging units, Mrs Watsons believed this was something that needed to be considered, however believed that if electric vehicles were being encouraged then the service needed to be provided.

1.9 John Long – Western Institute of Technology at Taranaki (WITT)

Taranaki had aspirations regarding the Taparoa and the Road Map 2050 and WITT supported this economic development plan. WITT saw vocational education as a big part of the solution for Taranaki being able to deliver this plan and for New Zealand to deliver what was challenging requirements with regard to the climate change commissions and the net zero ambitions of net zero act 2050.

The Productivity Commission also provided challenges around the future of work and both would require a major work force transformation. WITT sought support from the Council in helping them to do that, they saw WITT as the community colleague however acknowledged that they had not done enough in South Taranaki but want to make that right.

WITT supported and would like to be involved with Te Ramanui o Ruapūtahanga, the coming together of the Hāwera High School and Hāwera Intermediate onto a single site and suggested that it would make a perfect home for a South Taranaki WITT campus. This created another opportunity around if this could be an eco campus or support WITTs ambition and bring a centre of vocational excellence in engineering and energy. WITT sought the Councils support.

WITT supported and endorsed the Business Park ambitions and would like to work with the Council to upskill the region. The education had to fit around the learner. WITT sought support in the equestrian community and proposed partnerships with WITT and Massey University regarding Veterinary Science and with UCOL and vet nursing another opportunity to be canvassed.

At a Taranaki level WITT had a strategy at WITT which was Te Korowai Mākauranga o Taranaki, the cloak of knowledge to be wrapped around the region. Doing that through four pous and weave through the delivery units in schools. For New Zealand they knew to get to net zero carbon by 2050 they radically change the primary, transport and construction industries. They believed education was a big part of that solution. WITT would like to work the Council and community in setting up a national centre for sustainable tourism and bio diversity and suggested that the natural home for this would be at TOPEC given that all children went through that as part of their high school experience.

WITT sought support for what they had proposed to the Taranaki Regional Council with regard to a hydrogen public transport system that serviced right around the mountain and the suggestion for it to extend from Ōpunakē along the surf highway to New Plymouth as a possible new addition to that route.

WITT provided a campus map that reached out to Taranaki entire communities via road, fibre, marae, high school, libraries and sought to develop points of presence through community owned assets where people could access future education and they looked to this Council to support those visions.

Councillor Filbee liked the aspirational aspects of what was proposed and queried what the timeframe was for those outlined, Mr Long explained that it was a 10 to 15 year development. WITT had provided the crown a five year plan that sought to deliver on a large portion of this. In terms of South Taranaki, the five year plan included the South Taranaki combined campus and the South Taranaki Business Park.

In terms of the current roll at WITT, Mr Long explained that the current roll was 1,700 equivalent full time students. Of these 1,600 were domestic students. This region had under provision for territory education because WITT were the only public provider in the region. WITT had not played its part in the community development, together with the community it should have grown. The economic analysis had shown that the Taranaki region had left half a billion dollar of government funding on the table over the past 15 years, however this was an opportunity to turn it around in the coming years.

Councillor Langton asked how many of the roll originated from South Taranaki. Mr Long commented approximately 300 and many at the lower were taught here, some were taught in the high school and many caught the connector bus to campus. This was something they intended to grow through the upskilling of people and the innovations area with people who were wanting to start a business.

There was a discussion around how to retain youth and young people to stay in the rural communities, Mr Long explained that WITT were encouraging students to carry out their study for one or two years before moving on.

In terms of the impacts of the oil industry, Mr Long had seen it as a massive opportunity. The decision did not impact WITT as they undertook little training around the oil industry. WITT had partnered with Ari Ake the new energy source and the University of Canterbury in this space.

#### 1.10 Neal Harding

Mr Harding shared his thoughts about the Long Term Plan, specifically to Eltham where he resided. His impression of the plan which was mooted a few years prior about the rejuvenation of the central business district in Eltham, was that it was focused more on enhancing the visitor experience to Eltham, rather than enhancing the quality of the lives of those that lived in Eltham. The focus also appeared on what the people who developed the graphics for the proposal, in what he felt was the wrong part of town. Eltham did not have a centre of town, the centre to an extent was the public library which was in a problematic location.

In his opinion the focus of any rejuvenation of Eltham was to make it a town that was child friendly, it also made it friendly for families with young children which was something the town tended to lose. The census result was that Eltham was overrepresented for young children and young families and was overrepresented for retirement age and it dropped away in the middle. The reality of Eltham was although there were many industrial jobs the industrial job to population ratio was high and many people resided outside of Eltham.

In order to change that Eltham needed to become a town where people wanted to raise young families in beyond when they made their own choice to move on. He did not think the redevelopment of Bridge Street would achieve that. He did not think Long Term Plan proposal to make South Taranaki the most liveable District in New Zealand. He had drawn up a proposal where he would pedestrianize Bridge Street which was a much more desirable area of town. There also needed pedestrianization of the some of the streets parallel to the state highway making it safer for children. He suggested that the budget fund for Bridge Street should be used elsewhere. If those streets were made pedestrian first and vehicle movements second it would serve to connect the town.

Mayor Nixon noted that if this was approved than community consultation would be undertaken and his proposal could be fed into that.

In response to the query for Mr Harding to expand on his idea of pedestrianizing streets in Eltham, Mr Harding explained that the work patterns tended to be around shifts. For example, on Stanners street would be pedestrianised leaving Collingwood Street and the main road busy but Stanners Street vehicles would give way to pedestrians.

Clarification was sought on what Mr Harding supported in terms of the Town Centre Upgrades. Mr Harding supported that money being spent on improving the quality of lives for the residents by pedestrianizing streets, upgrading the public toilets at the various playgrounds etc. He would be happy to engage in the process.

#### 1.11 Vicki Koubaridis

Ms Koubaridis spoke to her submission and covered the following points:

- The Waverley Pools was a fantastic facility and was well supported by the community. She supported an additional budget set aside for the Pool Upgrades to include activities for the youth to do. She would like to see detailed plans on what was being proposed.
- Supported the Kiwi sculpture but not to the extent of \$155,000 of the Council's budget. She was a community minded person and was a great believer that people appreciated things more when fundraising had been undertaken. She considered a \$40,000 to \$50,000 contribution from the Council to be sufficient. More public art was needed.
- The Waverley Beach was an asset and a hidden gem and she believed the Waverley Beach Campground was run to its full potential. She suggested the creation of an App where people could book and pay for their site online would bring in more revenue.
- Ms Koubaridis was passionate about developing a walkway along the cliff tops at the beach to link the two communities together and in time would link with the walkway to the Waverley Township. Story telling along the cliff tops would be important.
- The Aotea Park was well used, however it required some improvements to be made such as shading for wet or shine and the development of a bike track. This needed to be led by the Council not the Community Board.
- Waitōtara and Waverley was the gateway for Taranaki.
- Supported the development of the Waverley Town Belt would be more beneficial than a walkway to the beach. There were passionate people who would like to provide input into the plans for the Town Centre Masterplans.

In terms of the Council taking the lead for improvement to Aotea Park, Ms Koubaridis explained that the Community Board were working to move this forward, however she would like to see the project undertaken as a partnership between the Council, Community Board and the community.

Councillor Rook queried whether more community consultation was required around the Kiwi sculpture to get a consensus on what was wanted. Ms Koubaridis believed that further community consultation was needed which included more detail around the cost and budgets for the project. There was currently a misperception in the community around where the funding was coming from.

#### 1.12 Bob Hayes

Mr Hayes was keenly interested in the development of the Waverley Town Belt as a recreation reserve with an emphasis on turning that part of the Town Belt presently leased for pastoral purposes into native bush, walkaways, cycleways, bridle paths and other equestrian amenities/facilities. This would then be a location that would be particularly beneficial to youth. He noted that there was a growing demand in the community for this land to be returned to nature.

In response to the query around how, Mr Hayes envisaged facilitating the transfer of the town belt into what he was proposing. Mr Hayes believed it would be similar to Pukekura Park where someone had a vision and that vision was pursued. He brought to the Councils attention various options for ownership of the land.

1.13 Vicki Koubaridis and Bob Hayes – Waverley Chamber of Commerce (the Chamber)

The submission focused primarily on the Waverley Upgrade Plan (the Plan) and its implementation. The Plan identified many projects and design interventions however no detailed costings had yet been undertaken. Through the Long Term Plan \$2 million was being proposed and it was obvious that many projects could not be undertaken due to the constraints of the budget. This would require the prioritisation of projects. This was not understood by the people in Waverley which indicated a lack of community engagement.

The Chamber suggested that the Council establish a small diverse group of interested Waverley organisations and residents to assist with designing those projects listed in the Plan. Community input was valuable. It was acknowledged that there had been a lack of engagement from the community there were interested people. It was important that the process and project priorities must be informed by Plan and it was suggested that each project receive a rating in terms of its purpose in the Plan.

In terms of the Town to Beach Pathway or the Town Belt Pathway the Chamber questioned which project met the purpose of the Plan. They were not persuaded that the Town to Beach Pathway would be well used by Waverley residents or would significantly revitalise Waverley when compared to the Town Belt Pathway. The Chamber questioned what process determined the priority.

Regarding the Kiwi sculpture proposal, the Chamber questioned whether this was great value for money. The Chamber were not against the statue being included as part of the overall scheme however would give greater priority to the arresting Gateway. The Kiwi sculpture could be part of that of the attraction but on its own it would add little to the sought after vibrancy. The Chamber considered the public art component of the Plan integral to revitalisation and asked that the Council explore better ways to celebrate and promote Waverley's equestrian history. The Chamber asked that the decision be deferred until the final outcome of the Innovative Streets project

Mayor Nixon clarified that the 2019 Plan was developed by the previous Council, however it would be used as part of the consultation. The Council would undertake community consultation. Any artwork which included the Kiwi Sculpture would be included as part of the Town Centre Upgrades.

Ms Aitken explained that when the Council reviewed the budgets the Council made the decision to remove the Pathways Programme and agreed that the amount for specific pathways in the Town Centre Masterplan would remain in the budget. The two pathways mentioned were included as part the Town Centre Masterplan.

**The meeting concluded at 12.45 pm.**

**Dated this            day of            2021.**

**CHAIRPERSON**

# Pūrongo Report

To	Extraordinary Council
From	Kaihautū Ratonga Waeture / Regulatory Manager, Chantelle Denton
Date	26 May 2021
Subject	<b>Adopt Dog Registration and Animal Impounding Fees for 2021/2022 Financial Year</b>

(This report shall not be construed as policy until adopted by full Council)

## Whakarāpopoto Kāhui Kahika / Executive Summary

1. Local authorities are required to adopt their dog registration fees for the financial year and publicly notify the fees at least once in June. This report seeks that the proposed fees for the 2021/22 financial year be adopted. There is no proposed increase from the 2020/21 financial year.

## Taunakitanga / Recommendation(s)

THAT the Council adopts the following Dog Control and Registration fees for 2021/22 in accordance with section 37 of the Dog Control Act 1996, and animal impounding fees, to be publicly notified in June 2021:

Dog Impounding Fees	
Dog Impounding (1st)	\$90.00
Dog Impounding (2nd)	\$135.00
Dog Impounding (3rd)	\$180.00
Sustenance per day (payable on impound and every 24 hours thereafter)	\$15.00
Destruction of Dog	\$65.00
Dog Re-Housing Fee	\$50.00
Other Animal Impounding Fees	
Stock Impoundment (excluding sheep and goats)	\$115 plus \$10 per animal
Sustenance per day (stock)	\$12.00
Impoundment of other animals	\$75 plus \$10 per animal
Sustenance per day (other animals)	\$12.00
Notification by advertising	Actual cost
Driving and/or cartage, plus related costs	Actual cost

<b>Other Fees</b>	
Grazing Permit - Urban Area	\$50.00
Call out	Actual cost
<b>Other Dog Charges</b>	
Microchipping (at the Pound)	\$50.00
Microchipping (by arrangement)	\$70.00
Bark Collar Hire (2 weeks)	\$54.00
<b>Dog Registration Fees</b>	
Note: Dogs must be registered within 3 months of birth	
<b>Standard</b>	
Urban	\$150.00
Rural (1st 2 dogs) (per dog)	\$59.00
Rural (3 or more) (per dog)	\$49.00
Urban spayed/neutered	\$123.00
Selected Owner Policy - entire	\$92.00
Selected Owner Policy – spayed/neutered	\$71.00
Seeing eye dog	Free
Dangerous dog	Base Fee plus 50%

Rural (1st 2 dogs) (per dog)	\$88.50
Rural (3 or more) (per dog)	\$73.50
Urban spayed/neutered	\$184.50
Selected Owner Policy - entire	\$138.00
Selected Owner Policy – spayed/neutered	\$106.50
Seeing eye dog	Free
Dangerous dog	Plus 50%

### **Kupu Whakamārama / Background**

- The Council is required to formally adopt its dog control fees for the next financial year by the end of May as Section 37 (6) of the Dog Control Act 1996 requires the Council to notify the fees, at least once, in June.
- The schedule of dog control and registration fees are sent out to each dog owner with their invoice during June.

### **Local Government Purpose**

- The purpose of local government is to enable local democratic decision making on behalf of communities. The adoption of dog registration fees promotes the social and environmental well-being of the community in the present and for the future.

## Whaiwhakaaro me ngā aromatawai / Considerations and Assessments

### Assessment of Significance and Engagement

Criteria	Measure	Assessment
Degree	The number of residents and ratepayers affected and the degree to which they are affected by the decision or proposal.	Residents that currently own a dog or considering owning a dog in the future will be affected by the proposed dog registration fees.
LOS	The achievement of, or ability to achieve, the Council's stated levels of service as set out in the Long Term Plan 2018-2028.	There are no proposed changes to the levels of service for Animal Control in the 2018-2028 or the 2021-2031 LTP currently being consulted on.
Decision	Whether this type of decision, proposal or issue has a history of generating wide public interest within South Taranaki.	Dog registrations fees are advertised each year in the Taranaki Star and there is no evidence that these advertisements have generated wide public interest.
Financial	The impact of the decision or proposal on the Council's overall budget or included in an approved Long Term Plan and its ability to carry out its existing or proposed functions and activities now and in the future.	There are no proposed increases to the dog registration fees for the 2021/22 financial year.
Reversible	The degree to which the decision or proposal is reversible.	Once the fees are adopted the decision cannot be reversed. The fees will be reviewed by the Council for the next financial year.

5. In terms of the Council's Significance and Engagement Policy this matter is of low significance.
6. The level to which the Council will engage will align with the significance of the decision to be made, which will be to inform via public notification in the Taranaki Star.

### Legislative Considerations

7. The Council is required to formally adopt its dog control fees for the next financial year by the end of May, as Section 37 (6) of the Dog Control Act 1996 requires the Council to notify the fees, at least once, in June.

### **Financial/Budget Considerations**

8. No increases to the dog registration fees are proposed for the 2021/22 financial year. The public notice will be published in the Council's Southlink, which appears in the Taranaki Star.

### **Consistency with Plans/Policies/Community Outcomes**

9. This matter is consistent with the Council's plans and policies, including the Dog Control Bylaw. This decision contributes to the vibrant, together and sustainable community outcomes.

### **Impact on Māori/Iwi**

10. There is a positive impact on Māori and Iwi along with the rest of the community to have dogs within the South Taranaki District registered. The registering of dogs provides a safe community for residents and ensures that the Council meets the requirements of the Dog Control Act 1996.

### **Whakakapia / Conclusion**

11. This report seeks that the Council adopt the registration fees set out in this report and publicly notify them as required.

# Pūrongo Report

To	Mayor and Councillors
From	Tumu Whakahaere / Chief Executive, Waid Crockett
Date	26 May 2021
Subject	<b>2021-2031 Long Term Plan – Deliberations Report</b>

(This report shall not be construed as policy until adopted by full Council)

## Whakarāpopoto Kāhui Kahika / Executive Summary

1. The deliberations report provides a summary of the feedback received on the three key proposals included in the 2021-2031 Long Term Plan (LTP) Consultation Document. The report also provides management comments on the submission points raised as part of the consultation process.
2. It is recommended that the Council considers the following order of proceedings for the deliberations meeting:
  - Receives the 215 submissions on the proposed 2021-2031 LTP and Consultation Document.
  - Considers the summaries and recommendations for the Council's three main proposals: Environment and Sustainability Strategy, South Taranaki Business Park and the five Town Centre Master Plans.
  - Considers the management comments for each of the submission points raised ([Appendix 1](#)).

## Taunakitanga / Recommendation(s)

THAT the Council:

- a) **Receives** the submissions on the proposed 2021-2031 Long Term Plan and Consultation Document.
- b) **Confirms** Option 1 of proposal one, to fully fund the proposed Environment and Sustainability Strategy, to be included in the final 2021-2031 Long Term Plan.
- c) **Confirms** Option 1 of proposal two, to complete all three stages of the proposed South Taranaki Business Park, to be included in the final 2021-2031 Long Term Plan.
- d) **Confirms** Option 1 of proposal three, to develop and fund the five Town Centre Master Plans (Ōpunakē, Manaia, Pātea, Waverley and Eltham), to be included in the final 2021-2031 Long Term Plan.

- e) **Considers** the submissions and management comments (Appendix 1) and where necessary resolves any changes to be included in the final 2021-2031 Long Term Plan.

## **Kupu Whakamārama / Background**

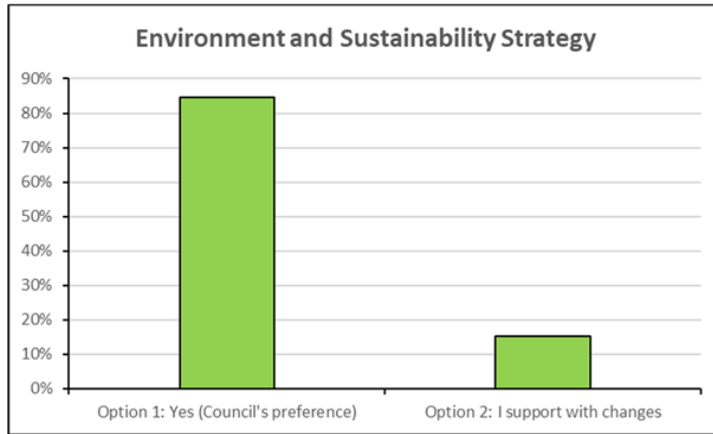

3. The Council is required to develop and adopt a Long Term Plan every three years under the Local Government Act 2002 (LGA 2002). The legislation also requires the Council to adopt a Consultation Document and undertake a special consultative procedure.
4. Consultation with the community was undertaken between 31 March and 7 May 2021. During this time 23 community meetings were held throughout the District plus an online zoom meeting. A total of 215 submissions were received with 33 submitters speaking to the Council.
5. The Council is now at the stage of deliberating on submissions received and making decisions to finalise the 2021-2031 LTP. To support the Council's decision making process, this report includes analysis on the three key proposals and management comments on the submissions, attached as Appendix 1.
6. Management comments on the submissions are set out in Appendix 1. These include suggestions from Council staff in response to the individual submission points received through the public consultation process. For each submission point raised the Council needs to consider accepting the submission point, declining the submission point or requesting further investigation.

## **Key Consultation Questions**

### **Environment and Sustainability Strategy**

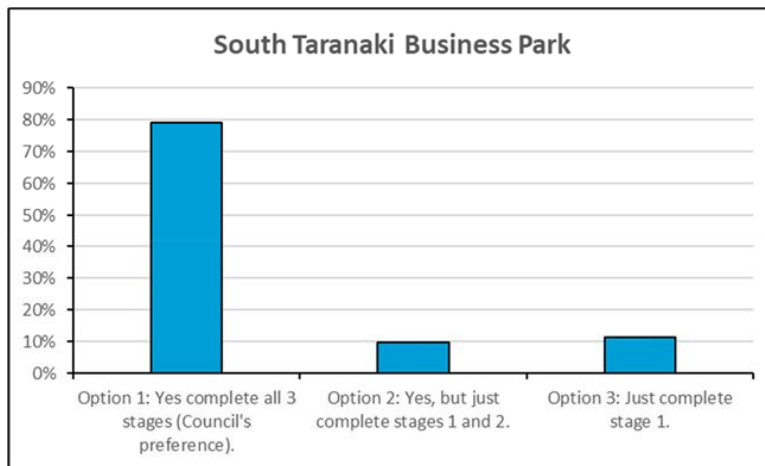

7. The draft Environment and Sustainability Strategy was consulted on as part of the 2021-2031 LTP. The public were asked if they supported the Council fully funding or partially funding the Environment and Sustainability Strategy. There were 144 responses received on this proposal with 122 supporting option 1 to fully fund the Strategy and 22 supporting option 2 to partially fund the Strategy. Of the 22 responses to partially support option 2, 4 responses recommended that less funding be allocated and 18 responses recommended that more funding be allocated.
8. Environmental sustainability and climate change are important issues. To meet the challenges and legal requirements set by the Government, the Environment and Sustainability Strategy was drafted. The implementation of the Strategy will enable the Council to carry out a Biodiversity Restoration Project; identify, map and protect the District's remaining indigenous vegetation and ecosystems; develop and implement an energy and carbon reduction plan; plant more trees on Council-owned land; develop a District Climate Change Adaption Plan; and in partnership with the Stratford and New Plymouth District Councils, investigate building a commercial composting facility in South Taranaki.

9. Given the response in favour of option 1 to fully fund the Environment and Sustainability Strategy, and the 18 responses to increase the funding, it is recommended that the Council confirms the Strategy and the proposed budgets for inclusion in the 2021-2031 Long Term Plan.

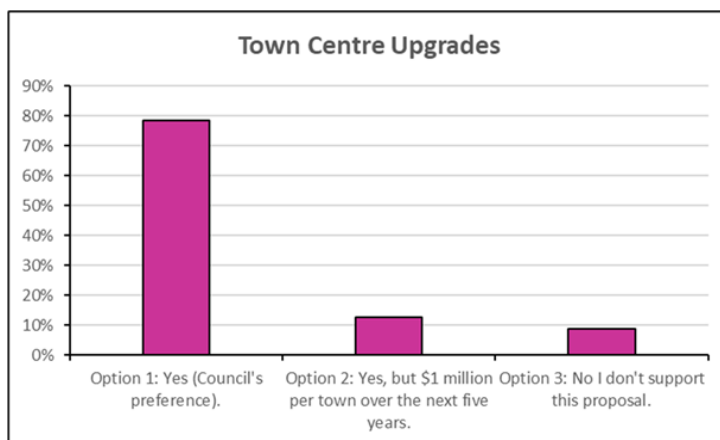

**South Taranaki Business Park**

10. One of the Council’s key themes for the 2021-2031 LTP was to encourage sustainable growth. The proposed business park would meet the demand from new and existing businesses to establish and grow. Three proposals were presented to the public: complete all three stages of the business park; complete stages one and two only; do not progress beyond stage one. There were 134 responses received on this topic with 106 supporting option 1 to complete all three stages, 13 supporting option 2 to complete stages one and two only, and 15 to not progress beyond stage one.
11. Given the demand from new and existing businesses to establish a business park and the Council’s commitment to encourage sustainable growth, it is recommended that the proposed budgets in the 2021-2031 LTP to complete all three stages of the business park be confirmed.

**Town Centre Upgrades**

- 12. Town centre upgrades for Pātea, Waverley, Ōpunakē, Manaia and Eltham were identified as part of the 2018-2028 Long Term Plan. The proposal in the Consultation Document asked the community to consider undertaking all of the upgrades for each of the plans over ten years at a cost of \$10.6 million; reduce the budget and shorten the timeframes, \$1 million per plan; or do not undertake any of the town centre upgrades. There were 136 responses received to this proposal with 107 supporting option 1 to undertake all of the upgrades; 17 selected option 2 to reduce the budget and shorten the timeframe; and 12 supported option 3, to do nothing.
- 13. The town centre master plans align with three of the Council’s community outcomes, vibrant, together and prosperous. Given the demand from the community and the Council’s commitment to encourage sustainable growth and provide a healthy, safe District with connected communities, it is recommended that the proposed budgets to complete option one be confirmed.

**Management Comments**

- 14. Management comments have been provided for each submission point raised (Appendix 1). The Council needs to consider accepting the submission point, declining the submission point or request further investigation. It will need to resolve decisions that impact or change the proposed 2021-2031 LTP and outline the reasons for the change.

**Local Government Purpose**

- 15. Developing and consulting on a Long Term Plan is a statutory requirement under the Local Government Act 2002. Deliberating on the submissions received through the LTP process enables democratic local decision making and action by, and on behalf of the South Taranaki Community. The 2021-2031 LTP aligns with the four well-beings and promotes social, economic, environmental, and cultural well-being for our Community in the present and for the future.

## **Whaiwhakaaro me ngā aromatawai / Considerations and Assessments**

16. The Council has undertaken a special consultative procedure on the proposed 2021-2031 LTP and Consultation Document. The purpose of this report is for the Council to consider the feedback and submissions received through the consultation period. The decisions made in response to the LTP submissions align with the Council's Significance and Engagement Policy.

### **Legislative Considerations**

17. The LGA 2002 requires the Council to provide a reasonable opportunity for people to present their views, to consider their submissions and views with an open mind and give these views due consideration when making a decision. The Council is also required to advise submitters of its response to their submission.

### **Financial/Budget Considerations**

18. The financial implications of the proposals in the LTP are provided in the Consultation Document and supporting information. The development of the LTP sets the proposed budgets and associated rates impact for the following ten years. The costs associated with the development of the LTP are included within current budgets. Any further changes to the LTP as a result of the deliberations process, such as those resulting from public submissions, would require the Council to consider the financial impact on the LTP budgets.
19. Consideration needs to be given to year one of the 2021-2031 LTP capital works programme as projects may need to be deferred to ensure that the programme of works can be achieved.

### **Consistency with Plans/Policies/Community Outcomes**

20. The development of the LTP defines the Council's planning for the next ten years. The policies and information within the LTP align with the Council's community outcomes; Vibrant South Taranaki; Together South Taranaki; Prosperous South Taranaki and Sustainable South Taranaki.

### **Impact on Māori/Iwi**

21. Iwi and hapū groups have been consulted and their submissions are included for the Council to consider. Submissions were received from Te Runanga o Ngāti Ruanui Trust and Te Korowai o Ngāruahine. Both Iwi requested that reference to the Iwi-Council partnership being developed is brought forward in the Long Term Plan document along with the Building Māori Capacity to Contribute to Council Decision Making Policy. These points have been addressed in the management comments (Appendix 1).

### **Affected Parties Consultation**

22. Those people that provided submissions during the consultation phase will receive responses to the points they raised, based on the decisions made by the Council.

## Whakakapia / Conclusion

23. This report seeks that the Council receives and considers the submissions received through the consultation phase. The report also seeks that the Council resolves any changes or amendments on the proposed 2021-2031 LTP, including the three key proposals identified by the Council; Environment and Sustainability Strategy; South Taranaki Business Park; and the five Town Centre Master Plans.

Waid Crockett

**Tumu Whakahaere / Chief Executive**

# Extraordinary Council - Reports

APPENDIX 1

Submission Number	First Name	Last Name	Organization	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 3 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.6 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Fiddes, Waverley, Manana, Opawa and Eihman.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
001	Daryl	Smith	Manawatu Fresh Trust	Recommendation on continuing to support walkways and cycleways development. They attached a 30 year regional trails vision.	Option 1: Yes (Council's preference)	This supports the Council's Sustainability Strategy, particularly 'Green Transport'.					1. Our Environment and Sustainability Strategy contains new work programmes that will be reviewed to ensure we continually improve our carbon reduction and environmental sustainability each year. Active and green transport alternatives are crucial to us as we meet our national climate change commitments. 2. Pathways are a key project identified as a priority for development by the Council and funding is included for specific pathways in the Town Centre Master Plan Budgets.			
002	Paula	Smith	Manawatu Observatory	Request for signage, drinking water and lighting	Option 1: Yes (Council's preference)						Regional 1: Environment and Sustainability Strategy. We received 146 responses to the Environment and Sustainability Strategy and proposed Budgets, with 122 supporting option 1 to fully fund the Strategy and 22 supporting option 2 to partially fund the Strategy. The deliberations report recommends the adoption of the Strategy along with the proposed budget. Regional 2: South Taranaki Business Park. We received 142 responses to the proposal to complete all three stages of the South Taranaki Business Park with 107 supporting option 1 to complete all three stages, 17 supporting option 2 to complete stages one and two only, and 12 to complete stages one and two only. The deliberations report recommends the approval of the budget within the 2023-2028 10-year plan to complete all three stages. Some maintenance work is required around the Observatory and this will be programmed. It is considered impractical to alter all the lighting around the observatory to remove light pollution. There is drinking water in the observatory and a drinking water fountain nearby at the toilet block beside the playground.			
003	Joan	Hunt		1. Hibiscus Observatory - Request for maintenance, 2. wall outside the Cinema is being used as a car wash, light pollution is issue.	Option 1: Yes (Council's preference)	Schools to be involved in projects like Hibiscus Lake.	Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)	Work is needed around Manana especially.	Standard response for Proposals 1, 2 and 3 required here.			
004	Judy	Thomas		Supports investing in residential and business development such as increasing the number of walkways or cycleways areas in the District.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Supports the business park and knows of many people in South Taranaki that are very much support. If anything, please speed up the development.	Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
005	Don Scott	Wendy Scott	Creative Taranaki	Creative Taranaki asks that Council funds an organisation to manage investment in arts and creativity, (create a vibrant and vibrant region creative economy, enable collaboration between arts and culture groups. Activate strategies to fund and promote to upgrade and empower local artists. Annual administration (Creative Taranaki) are seeking a funding amount of \$25,000, depending on a contribution by the Taranaki Regional Council.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
006	Brian	D Sullivan		Seeks the proposal for increasing staff wages, does not support an increase anywhere from inflation.	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Option 1: I support the Environment and Sustainability Strategy, please see the purpose for the significant staff increase and consider the rest to have an effect and to be a waste of funds.	Does not support, considers there is need to be in support, considers there is need to be in support, considers there is need to be in support, considers there is need to be in support.	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Supports business, but after that building an egghead time and value over one year, following the upgrade.	Standard response for Proposals 1, 2 and 3 required here.			
007	Denny	McCowan			Option 1: Yes (Council's preference)	The environment is important and all proposals should be followed through.	Option 1: Yes (Council's preference)	Support at the very least for the first stage but option two has extra to allow for growth in support.	Option 1: Yes (Council's preference)	Upgrades are important to attract people to the area.	Standard response for Proposals 1, 2 and 3 required here.			
008	Shirley	Hartley		1. Support a scheme between Napier car park and Union Street but the car parks need to be linked, 2. This required being on Campbell Lane.	Option 1: Yes (Council's preference)		Option 1: Yes, but just complete stages 1 and 2.	Option 1: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Option 1: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.		Standard response for Proposals 1, 2 and 3 required here.			
009	Jane	Hewson			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Upgrades are essential to what town survival.	Standard response for Proposals 1, 2 and 3 required here.			
010	Maria	Brewerton			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Upgrades are essential to what town survival.	Standard response for Proposals 1, 2 and 3 required here.			
011	Jessica	Ward		Request/cycle way needs to go from Tairāwhiti Road railway crossing to Austin Road.	Option 2: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Leave out sections 3 and 4	Option 2: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	No direct benefits to them.	Standard response for Proposals 1, 2 and 3 required here.			
012	Debbie	Thomas		1. Support the investment in a walkway like New Plymouth/Blenheim. 2. Invest more in industrial areas. 3. Invest in facilities like Hibiscus Gardens. 4. Support any other use of funds in the area.	Option 2: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.		Option 2: Yes (Council's preference)		Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Shift this investment to Hibiscus.	Standard response for Proposals 1, 2 and 3 required here.			
013	Jane	OSBORN		1. Request additional toilets in the townships between the toilet at Hibiscus Bay is inadequate and very 2. Devolve the Opawa Lake into a wetland area. 3. Develop gains of interest in the area the location of areas on the walkway.	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Consider risk rate playing projects to be involved and carbon reducing areas	Option 2: Yes, but just complete stages 1 and 2.	Option 1: Yes (Council's preference)	Option 1: Yes (Council's preference)	Opawa has 2 derelict buildings on Tairāwhiti Street. Supports planning a C&I project to help attract visitors to the area. Examples of this, are in the comments. Support the development of small industry.	Standard response for Proposals 1, 2 and 3 required here.			
014	Hayden	Boyle			Option 1: Yes (Council's preference)	Would like to see more done around carbon reduction and environmental sustainability.	Option 1: Yes (Council's preference)	Suggest undertaking a viability review prior to committing to Stage 3.	Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
015	Jonathan	Brady	Conk's Systems Limited	Submitter asks that installation of heatpumps and solar hot water devices in new homes are mandated to meet Napier's climate target. Would also like to see funding being/grants or rates' based loans to help install these devices.	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Would like to see funding for heatpumps and solar hot water devices and heating for home owners.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
016	Julie	OSborne			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
017	John	Alan	Albus		Option 1: Yes (Council's preference)		Option 2: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
018	Marlene	Hopper			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
019	Josephine			Suggests adding green waste bins to sites.	Option 1: Yes (Council's preference)		Option 2: I support Council's proposal Environment and Sustainability Strategy with changes please see what changes you would like to see in the comments.	Submitter questions why Hibiscus, what about other areas?	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.		Standard response for Proposals 1, 2 and 3 required here.			
020	Diana	Wier		Would like the Opawa water supply to be fixed, i.e. clean and drinkable.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			
021	Helen	Margaret		Submitter would like to see a road to the Hibiscus Impoundment 2, water problems fixed, 3 and the lake protected.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposals 1, 2 and 3 required here.			

# Extraordinary Council - Reports

Submissions Number	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Patea, Waverley, Mania, Opunake and Eihana.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
022	James	Beres		Submitter would like to see: 1. Signposting of Kerry Lane (start with lighting, footpaths etc) 2. The environment maintained to good standard throughout construction. 3. Landscaping when complete. 4. Signage to show complete.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter asks if the current owners of businesses have to pay a contribution to upgrade.			1. Owners of existing businesses will not have to contribute to the infrastructure upgrades at the South Taranaki Business Park. The Council will receive financial contributions from businesses participating in the park to help repay the loan. This means the impact rates for the business park will be minimal (Stage 1) would be an extra 10 cents a week for the average urban residential ratepayer.  2. Feedback from residents and business owners has emphasised the need for improved road infrastructure for traffic flow and safety and this is a key consideration in the design of South Taranaki Business Park infrastructure. A traffic impact assessment will ensure current traffic volumes and provide advice for the best treatment and infrastructure options. Council has engaged with Waikato NZTA and will ensure the road network of upgrades are fit for the future. One area likely to include speed reduction, turning lanes, 400 lanes, the widening of Kerry Lane and Fitzgerald Lane and new roads within the business park.  3. Because the Business Park is located within a relatively high water table the project team is focused on installing stormwater infrastructure that will address potential stormwater issues.  4. Although all the land in the South Taranaki Business Park is privately owned, STCC can work with developers to ensure visual impacts are considered, which may include landscaping. Council are encouraged by the efforts being made in this regard by active developers.  5. STCC also recognise the importance of high speed internet to the success of the Business Park. At the end of 2023 a high speed internet distribution hub was installed on Kerry Lane and cabling will be laid in tandem with the rest of the underground infrastructure to provide high speed connections throughout the area.			
024	David	McIntyre			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		1. One of the Council's key focus areas for the 2023-2031 LTP is encouraging sustainable growth. The proposed South Taranaki Business Park and Five Town Centre Master Plan support the Council's vision. The Council will continue to partner with Victoria Taranaki Trust to provide support to new and growing businesses and to promote South Taranaki.  2. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continually improve our waste reduction and environmental sustainability targets each year. It will be difficult for us to significantly decrease residential waste to landfill and we have new infrastructure built locally that can divert that waste. Central Government will be implementing large-scale transformation changes to waste management in the next 2 years, including centralisation of Councils and the introduction of green and blue bins. Council can continue to encourage local businesses to reduce waste through collection, container reuse deposit schemes and banning single-use plastics, among other initiatives. However, we believe that we need to extend and move towards our own separate approach, and build a separate, circular economy to divert not waste from the waste hierarchy of the products we use. Council has already made the STCC Hubbin & Recycling App available for residents free of charge. This app can be downloaded from the Apple App Store and you can search through the items to see where, how, and if they can be recycled. Bottle bins and rigid-plastic bins are included in the app, among many other items.  3. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continually improve our carbon reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
025	Heidi	Stewart		Submitter considers the strengthening Environment and Sustainability strategy with changes please see what changes you would like to see in the comments.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
026	Heidi	Stewart		Submitter requests the toilets in the central carpark to be replaced or upgraded.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
027	Barry	Evans		1. Suggestion to put EV charging points for Taranaki a Southland. 2. Suggestion to remove the old Pharmacy building as it is unusable.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Suggestion to put solar panels, wind turbines on roofs to reduce operating costs and give them carbon credits.	Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
028	Neil	Taylor		Submitter would like to see the additional funding for the Parks Team to be moved into Year 1.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter prefers the name Industrial Park and the industry attracted be "new age" industry and businesses along the lines of robotics, AI, automation, service companies in food and drinks, maintenance and production of green energy systems amongst others. Suggestion that buildings built in the area be only certified if they plan solar / wind power on site to subvert power costs.	Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
029	Bernon			Submitter considers excluding his methane problematic when talking about the Council becoming carbon neutral by 2025. Would like to see more information around the business park and what might look like.	Option 1: Yes (Council's preference)		Option 3: Not complete stage 1.		Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
030	Heidi	Brownhill		Submitter supports the Council capitalising on the financial position it is in to make the District a more attractive district. Submitter encourages the Council to be a role model. Moved forward. Not done for being proactive and progressive have and making it a viable option for regional business.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
031	Trish	Adams		Submitter would like to see: 1. Confirmation of the plan and programme to begin the reinstatement of the walls (Patea Māori). 2. Plans have designed regularly to continue safety of our citizens and their cows. 3. Need money set aside to stabilise the Patea Māori. Submitter's preference would be the wharf and coal store area are demolished and use the area for casual recreation. Ideally the area at nearby spot would be good for beach fishing. 4. Consideration to be given to the purchase of the wharf and various home building and so on and develop the area into either visitors or put homes on there and sell them developed. Another option to approach into home companies to build a new home on the site.	Option 1: Yes (Council's preference)		Submitter suggests: 1. The fire getting premises/comparable to a central site will there be a collection site in each town. 2. Greenways disposal should be free. Fuelled and used for spreading over playground areas for use by the children.	Option 1: Yes (Council's preference)	Submitter would like to see: 1. More support for owners of building as a parking plan can be put in place. 2. The building at the north end of the Hunter Street Building converted into compact table blocks with tables and chairs on the lawn.	Option 1: Yes (Council's preference)	1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
032	Heather	Evans		1. Submitter suggests the Mania Lifestyle has a late night during the week or weekend allowing more opportunities for people to go there. 2. They like the efforts in the environmental and sustainability strategy, however would like to see more money spent on the development of wetlands and creating more functional nature ecosystems and food corridors.	Option 1: Yes (Council's preference)		Good forward thinking for future investment in business enterprise.	Option 1: Yes (Council's preference)	Will provide a benefit to the town and suggests youth in the park for each town.	Option 1: Yes (Council's preference)	1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
034	Matthew	Levings		1. Submitter would like to see more events in conjunction with other events to keep people in town. Suggests council events for 10-14 days with more bands/entertainment and use the event at Reserve Park. 2. Submitter suggests building a mountain bike track.	Option 1: Yes (Council's preference)		Suggested providing the carbon sinks are only option open, even in a forestry application.	Growth is good.	Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
035	Neil	Byrre		1. Would like to see action to invest prior and respect and a sense of belonging in the towns. 2. Quotes what will happen in the land when the 2 secondary schools merge and suggests it could be used for housing. 3. Supporting enhancing the existing facilities and upgrading the town. 4. Strongly oppose Government closing of our water. 5. Also that names of places are no longer changed - wants that people are unable to pronounce.	Option 1: Yes (Council's preference)		Submitter does not believe any year 1 investment and suggest considering it in 5 to 5 years and in 1 year. Educating people about recycling of the concerning water.	Submitter suggests using vacant bus lots.	Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
036	Jack	Expansive		Submitter would like to see the pavement/work/park extending along Taranaki Road to the top of the hill over the Christmas tree park.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
037	Anonymous			Submitter would like to see a waste and clean up jobs at the Patea Aquatic Centre.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
038	Julie Ann	Boots		Submitter asks if the speeding traffic could be addressed.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
039	Joseph	Beale		Submitter suggests providing a project to see support to high speed public transport, support and improve the road network.	Option 1: Yes (Council's preference)		to go to see how much the Council is planning, including going beyond what was mentioned.	benefits to farmers and surrounding areas.	Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			
040	Neil	McIntyre			Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		1. The Council is currently reviewing the Environment and Sustainability Strategy and will be reviewing it to ensure we continually improve our waste reduction and environmental sustainability each year. \$1,800 is budgeted in the 2024-25 financial year for what stabilisation and removal of debris.			

Extraordinary Council - Reports

Submits Date	First Name	Last Name	Organization	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next two years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 3 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.0 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waverley, Manuka, Opawa and Eihana.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info	
041	John	Oslen		Initial submission - verbal submission supported the proposal to complete all 3 stages of the South Taranaki Business Park.			Option 1: Yes (Council's preference).	To submit that in the South Taranaki Business Park STIC does all 3 stages of the Business Park infrastructure work, or no business has to come in. (Because they desire to choose another level of STIC does not have the infrastructure available when it is needed).			The support for the South Taranaki Business Park to become evident recently with significant demand coming from businesses wanting to establish themselves on Kery Lane and Fitzgerald Lane. STIC working with developers and the aim is to design and install infrastructure that meets current and future needs and fits with development/infrastructure as closely as possible.				
042	De	Devy		1. Submitter would like to see a further commitment on the part of the Council to support the residents in the residents of South Taranaki. Acknowledging the work done by Michaela Simons. Support a second phase to an overwhelmed existing site or funding that allows the community especially for creative activities. 2. Submitter supports the development of a vibrant Arts Trust that runs the length of South Taranaki supported by central funding signage. 3. Support for Council Taranaki a newly formed organisation is also an important - a new opportunity for the Council to embrace and contribute to.	Option 1: Yes (Council's preference)		Option 3: Just complete stage 1.		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here.				
043	Diana	Healy	T-Ara Ara Trust		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1 and 2 required here.				
044	John	Devy	Van Sma		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here.				
045	James	James			Option 2: I support Council's proposal Environment and Sustainability Strategy with changes (please see what changes you would like to see in the comments).						Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year.				
046	Margery	D'Arnell			Option 1: Yes (Council's preference)	Submitter thinks this funding will be used to create a more vibrant and culturally interesting South Taranaki area.					Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year.				
048	Barbara	Frankard			Option 1: Yes (Council's preference)		Option 3: Just complete stage 1.	Submitter suggests that before any option 3 considered STIC needs upgrading with turning keys to both Kery Lane and Fitzgerald Lane need to be completed as it is already dangerous as there is no room to get past a truck turning into these streets.	Option 2: Yes, but reduce the budget to \$1 million per town and undertake the work over the next five years.		Standard response for Proposals 1, 2 and 3 required here. 2. Feedback from residents and business owners in the South Taranaki Business Park area has highlighted the need for improved road infrastructure. Traffic safety and improved access are key considerations of the project and work to improve on this in terms of stage 1. A traffic impact assessment is underway that will ensure current traffic volumes and provide advice for the best treatment and enhancement options. The Council has engaged with Waka Kotahi NZTA and while the exact nature of upgrades are yet to be finalized, they are likely to include speed restrictions on SH1, turning keys, etc into the widening of Kery Lane and Fitzgerald Lane and new roads within the business park to improve connectivity and traffic flow.				
048	Yes	Pringle		Submitter encourages the Council to look at the investment fund and suggests investing in development of residential and business parks as the developer. The best time to do this is now.	Option 1: Yes (Council's preference)	Submitter supports this as long as it's not too far away from Oweke to ensure residents have a good experience. Supporting getting infrastructure in place early to avoid further impacts. Submitter would like to see Fitzgerald and Kery Lane connected through the back, small full capacity roundabout to ease future development and when the time.	Option 1: Yes (Council's preference).	Submitter would like to see stage 2 moved further away from Oweke to ensure residents have a good experience. Supporting getting infrastructure in place early to avoid further impacts. Submitter would like to see Fitzgerald and Kery Lane connected through the back, small full capacity roundabout to ease future development and when the time.	Option 1: Yes (Council's preference).	Submitter supports the development of works that will improve the business park area, including: new streets, playgrounds, social hubs, making it a place that attracts retail business but ensure it's maintained to highest level.	Standard response for Proposals 1, 2 and 3 required here. 2. Feedback from residents and business owners in the South Taranaki Business Park area has highlighted the need for improved road infrastructure. Traffic safety and improved access are key considerations of the project and work to improve on this in terms of stage 1. A traffic impact assessment is underway that will ensure current traffic volumes and provide advice for the best treatment and enhancement options. The Council has engaged with Waka Kotahi NZTA and while the exact nature of upgrades are yet to be finalized, they are likely to include speed restrictions on SH1, turning keys, etc into the widening of Kery Lane and Fitzgerald Lane and new roads within the business park to improve connectivity and traffic flow. Linking Kery Lane and Fitzgerald through the back appears to be the most efficient way to connect the northern and southern ends of the development. 3. The Town Centre Master Plan has been reviewed and further consultation will be undertaken with the community to confirm their priorities.				
049	John	Ngere		1. Submitter would like to see traffic controls to slow traffic through town if the roads are made more pedestrian friendly. This has planning trust be strategically placed to ensure it does not affect the safety of pedestrians to see traffic. 2. Submitter also supports the implementation of additional water monitoring to show an increase in water use efficiency in the District but this has brought forward into the current CIP to be done with the water reticulation proposals in the Stratford and HP Districts.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).	Great idea.	Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. 3. The Town Centre Master Plan has high level documents and further consultation will be undertaken with the community to confirm their priorities, including the suggestions made by the Submitter. The Council is currently obtaining costs for earthquake strengthening and upgrading both the Manuka Town Hall and Manuka Sports Complex. Once these costs are known, further work from the community will be sought. 4. Traffic and pedestrian safety will be considered as specific projects within the Town Centre Master Plan area.				
051	Alan	Alison		1. Submitter would like to propose that the walkway from Kipapa to Holland Gardens be added and work commenced as soon as possible as part of the plan.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. The proposal to install a pathway from Holland Gardens to Kipapa would need to be prioritised by the Council following consideration of other requests for pathways across the District. Currently there is no additional funding available for the pathway identified in the Town Centre Master Plan budget.				
052	Carol	Wahua		Submitter emphasises to concern about the Kipapa Stream and the water extraction pressure it is under and supports the construction of a second bore.	Option 1: Yes (Council's preference)	Submitter emphasises that the construction of the second Kipapa bore is important.	Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. Concerns about the Kipapa Stream and the water extraction pressure it is under have been noted. Water extraction will likely form part of water abstraction consent in the future.				
053	John	Devy			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here.				
054	John	Devy			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here.				
055	John	Devy			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here.				
056	John	Devy		1. Submitter supports the Council continuing to focus on reducing water losses from the District's water supply networks and exploring groundwater as a source of additional water supply at Kipapa and Eihana. 2. Submitter also supports the implementation of additional water monitoring to show an increase in water use efficiency in the District but this has brought forward into the current CIP to be done with the water reticulation proposals in the Stratford and HP Districts. 3. Submitter supports the implementation of additional water monitoring to show an increase in water use efficiency in the District but this has brought forward into the current CIP to be done with the water reticulation proposals in the Stratford and HP Districts. 4. Submitter supports the commitments to reduce stormwater and groundwater infiltration to the District's wastewater network, to upgrade wastewater networks and budget for tertiary treatment at the treatment plants, including Waverley.	Option 1: Yes (Council's preference)	Submitter commends the Council for the actions proposed in the Strategy including the Budgetary Measures Project and SDA.	Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. We will continue to focus on reducing water losses from our water supply networks and exploring groundwater as a source of additional supply at Kipapa and Eihana. 3. Bringing water monitoring forward to be in line with SDC and MDC's monitoring proposals would have been considered but would have been a duplication of what would have been done in the Stratford and HP Districts. 4. We will continue to be committed towards reducing stormwater and groundwater infiltration to the wastewater network, to upgrade wastewater networks and have budget for tertiary treatment at the treatment plants, including Waverley.				
058	John	David Campbell	Opawa Loop Trust	1. Trust supports Nobby to fit water pathway. 2. Trust requests much, ecological weed mat and native plants to be provided to Trust for planting etc. 3. Trust requests that the pathway adjacent to the Opawa Headland by the old wharf be raised further away from eroding cliffs.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. 2. The Council notes the Submitter's support for the pathway between Hwaera and Nobby. 3. Our Environment & Sustainability Strategy contains a number of new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. We will continue to support the work of the Opawa Loop Trust and acknowledge that the Trust contains a valuable contribution to the local community. However, the Trust contains a number of requests for pathways across the District. Currently there is no additional funding available for the pathway identified in the Town Centre Master Plan budget. 4. Council staff have met with Taranaki and the Opawa Loop Trust representatives to look at re-orienting sections of the pathway away from the cliffs.				
059	John	James	Border Ranges and Sports Club	The Club asks that the toilet facilities at Dalton Park Waverley be upgraded.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. Following a meeting with the Border Ranges Club representatives, Council staff agreed to investigate options to toilet facilities under the grandstand and explore for some concepts to be drawn up. General funding could be sought or the Council could consider to add an amount to the budget. However detailed drawings are not currently available.				
060	John	Bennett		1. Submitter believes that Kipapa is poorly represented in the CIP. 2. Requests that the Kipapa to Holland Gardens pathway be brought forward in the CIP. 3. Add a 50km/hr warning sign to the entrance of Kipapa. 4. Heat the Kipapa swimming pool.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. 2. The proposal to install a pathway from Holland Gardens to Kipapa would need to be prioritised by the Council following consideration of other requests for pathways across the District. Currently there is no additional funding available for the pathway identified in the Town Centre Master Plan budget. 3. There are 50km/hr warning signs posted on the road as you enter Kipapa, Kipapa signage could be added. 4. The Kipapa Pool has a small solar heating system installed along similar lines to the other rural community pools. These solar systems are not connected to "heat" the pool but rather to heat the oil of the water that feeds into the smaller "pool" for the benefit of the capacitor unit. There is no funding currently allocated to increase the use or capacity of the solar system at Kipapa.				
061	John	John		Submitter suggests to take over credit card debts at 0% and finance builders and home renovations doing new windows/roofs etc.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1, 2 and 3 required here. This proposal is outside the Council's core business. The submitter also comments regarding the return on CIP being below 5%, however the actual returns are in excess of 7%. The 600 beds must also be considered when considering such proposals.				
062	John	John	Taranaki District Health Board	Submitter suggests to: 1. Review the Strategy for water resources. 2. Upgrade for groundwater and take water, particularly around health and safety. 3. The Manuka Hall and Sports Complex. 4. Upgrade and expansion of Manuka Sports. 5. The development of a district business innovation and enterprise hub. 6. The proposal for water reticulation, with consideration for those suffering economic hardship. 7. The development of the District's infrastructure. 8. Investment to improve safety of freight systems. 9. Development of local Council partnership strategy. 10. Reconsider the development of a local wastewater treatment and sewerage regional facility. 11. Reconsider the investment in early fees for installing pools.	Option 1: Yes (Council's preference)	Ask that Council considers including strategies for compostable waste - representing vermicomposting of food scraps and green waste.	Option 1: Yes (Council's preference).		Option 1: Yes (Council's preference).		Standard response for Proposals 1 and 3 required here. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. A key project in the proposed regional commercial competing facility that could draw up to 40% of our waste from landfill. It will be built within the next 2 years and will accept of general waste, food waste and other organic waste streams, and will produce compost that can be sold. Studies of projects and opportunities, not only support that waste-to-energy technologies are under-developed and require, but their development claims for efficient energy generation offer viable environmental benefits. The Wairarapa Council has found that not only is waste-to-energy an expensive means of generating energy, but burning waste can produce as little as 10% of the energy of coal and 70% of the energy of natural gas while producing more times the pollution of those fuels. We need to embrace a zero waste approach and build a regenerative, circular economy to divert our waste from the waste-to-energy of the products we use. We should follow the waste hierarchy to prevent and reduce waste in the first place, and promote resources over strategies that destroy resources instead (e.g. incinerators and landfill). The more resources we can prevent in this way, the less we need to mine and extract new materials for new products, the most environmentally damaging part of the production phase. 3. The Town Centre Master Plan has been reviewed and further consultation will be undertaken with the community to confirm their priorities. 4. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. A key project in the proposed regional commercial competing facility that could draw up to 40% of our waste from landfill. It will be built within the next 2 years and will accept of general waste, food waste and other organic waste streams, and will produce compost that can be sold. Studies of projects and opportunities, not only support that waste-to-energy technologies are under-developed and require, but their development claims for efficient energy generation offer viable environmental benefits. The Wairarapa Council has found that not only is waste-to-energy an expensive means of generating energy, but burning waste can produce as little as 10% of the energy of coal and 70% of the energy of natural gas while producing more times the pollution of those fuels. We need to embrace a zero waste approach and build a regenerative, circular economy to divert our waste from the waste-to-energy of the products we use. We should follow the waste hierarchy to prevent and reduce waste in the first place, and promote resources over strategies that destroy resources instead (e.g. incinerators and landfill). The more resources we can prevent in this way, the less we need to mine and extract new materials for new products, the most environmentally damaging part of the production phase. 5. Support for the South Taranaki Business Park to become evident recently with significant demand coming from businesses wanting to establish themselves on Kery Lane and Fitzgerald Lane. STIC working with developers and the aim is to design and install infrastructure that meets current and future needs and fits with development/infrastructure as closely as possible. Although outside the scope of the CIP, the Council is currently obtaining costs for earthquake strengthening and upgrading both the Manuka Town Hall and Manuka Sports Complex. Once these costs are known, further work from the community will be sought. 6. Traffic and pedestrian safety will be considered as specific projects within the Town Centre Master Plan area.				

Extraordinary Council - Reports

Submits Date	First Name	Last Name	Organization	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Plan in Stage 1?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.0 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waiverua, Manuka, Opunake and Eiheman.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
08/11/2024	Rene	Rene	Urban Business and Professionals Association	1. Submitters ask that the budget increase for gardens is brought forward from year 4 to year 1 of the LTP. 2. Would the Council be able to explore relationships with the Retirement Communities Trust? 3. Would the maintenance for gardens in Eiheman be budgeted and paid for by the Council. Would the Council to subsidise housing developments in Eiheman.	Option 1: Yes (Council's preference)	Would like more funding allocated to projects such as Soldiers Park in Eiheman.	Option 1: Yes (Council's preference)	Submitters support the support of businesses in South Taranaki.	Option 1: Yes (Council's preference).	Submitters would like assurance that community consultation is undertaken before Eiheman upgrade commences, want community and Council to agree on the definition of the area defined as the heart, solutions must be practical and sustainable.	Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Daryl	Smith		1. Page 10 not enough money set aside for bridge replacements and upgrades. 2. Page 17 maintain Eiheman Central car park in steady state. 3. Page 18 more water set aside for the Opunake Road upgrade. 4. Page 19 encourage to better or improve expenditure on toilets, shops, convenience and car parks. 5. Page 20 improve water resilience for water storage. 6. Page 20-21 more water should be allocated more often especially high volume roads such as Palmer Road. 7. Page 23 encourage two facilities on one Manuka site. 8. Page 24-27 maintain all paths, tables, concrete ground and convenience to present or better level. 9. Page 28 maintain libraries to existing or better level. 10. Page 30 encourage library to engage with TTC through existing structure. 11. Reduce or stop using the road tree reserves. This involves a need for sustainable weeds such as yellow brittle grass. 12 - stop contractors mowing around roadbeds.	Option 1: Yes (Council's preference)		Option 3: Just complete stage 1.	Have site information	Option 2: Yes, but reduce the budget to \$10 million per town and undertake the work on the new towns.		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Simon	Clark		1. Remediation of Opunake Lakes urgent. 2. Information centre for Opunake	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stage 1 and 2.		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Heather	Gerrack		1. Plan is a complete waste of money. the world is too unstable. 2. Maintain existing in Opunake 3. Maintain Opunake water and pipes. 4. Maintain Opunake bike pathway. 5. Maintain paths to the beach. 6. Yes do a great job mowing of lawns and making the town so green.	Option 1: Yes (Council's preference)	First nature on suitable area	Option 3: Just complete stage 1.		Option 1: Yes (Council's preference).	Do the things the towns ask for	Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	John	Greer	Opunake and District Business Association	The Submitter would like to see the following items addressed in order of importance. 1. Water discussions. 2. Trees (planting - housing a solar and accessible to town and the beach. More signage to Middleton Bay, Opunake Motor Beach, Ariva Galleries and Studios. 3. Improvement in the public toilets behind Coastal Cafe. 4. Additional rubbish bins/containers around Freedom Camping sites. 5. Gardens in the main street regularly done. 6. Plan to sort the quality of the Opunake Lake.	Option 1: Yes (Council's preference)		Option 3: Just complete stage 1.		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Jane	Prentidge		Good, positive plan.	Option 2: I support Council's proposal improvement and sustainability strategy with changes being set what changes you would like to see in the community.	Submitter supports this, however suggest that the new planning committee be used to open up more of the land for the public at the same time.	Option 1: Yes (Council's preference)	Submitter supports this in terms of expanding the region. Submitter would like to ensure that residential developments were also being completed to a high standard and with sufficient services to support growth.	Option 1: Yes (Council's preference).	Submitter supports taking on each town and going on an identity is important that the residents are a support of the plan and regions giving priority to the town with the most local support.	Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Helen	Armstrong	Hawera Memorial Theatre Trust	Trust requests that funding be made available in the Plan for an air conditioning system for the Hawera Memorial Theatre complex.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	John	Wynn		Investigation register for community groups who bring visitors to the region.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	James	Day	Opunake Open Studios and Galleries	The Opunake Open Studios and Galleries was established by local artists in collaboration with the presentation of our work. Although we often receive a number of media articles we struggle to attract people to the main Street. There are many art galleries to pass through rather than stop and spend time looking around at all the art to see. The general feeling amongst the group is that signage on Taranaki Street directing people to the individual galleries is needed significantly increase patronage and encourage people to stop and take a look around our work.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Debra	Prentidge	Prentice Ltd	What do you think the Council Team that elevated Hawera as a town that provides, builds and cares for its community?	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Melanie	McLean			Option 3: Yes (Council's preference)		Option 2: Yes, but just complete stage 1 and 2.	Submitter supports this development but would like to see how well Stage 1 and 2 would be moving to Stage 3. This was there was the potential to spend \$10 million on projects in other smaller areas within South Taranaki.	Option 1: Yes (Council's preference).	Submitter would like the Council to consider a Town Centre upgrade for Kaponga in the next LTP.	Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Philip	Lee			Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stage 1 and 2.		Option 1: No (Don't support the proposal).	Submitters would like to see work done in Kaponga on the following: 1. Repairs to existing and new at Victoria Park 2. Concrete at memorial gates to be broken and replaced 3. Better water up an park and enough rubbish bin to accommodate for festival events.	Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Mike	Daye		Submitter would like to see: 1. Major road improvements on Bays Road before someone gets hurt. 2. Good Road work concrete work on some of the third corner as well as sealing. 3. Rubbish pickup needs to include Angles Avenue.	Option 1: Yes (Council's preference)		Option 3: Just complete stage 1.		Option 1: No (Don't support the proposal).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Debra	Wynn			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	Helen	Wynn			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	John	Wynn			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	John	Wynn			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			
08/11/2024	John	Wynn			Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference).		Submitters support the proposal. 1. The Town Centre Master Plan is a high level document and further consultation will be undertaken with the communities to confirm their priorities. 2. The Council has a good partnership with the Retirement Communities Trust but we always open to discussing how the Council and the Trust can continue building on that relationship. 3. The Council acknowledges the Retirement Communities Trust and the Retirement Communities Trust would be considered by Council and members. 4. The submitter's request for the Council to subsidise housing developments is acknowledged. Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2025.			

Extraordinary Council - Reports

Submits Sign Number	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.6 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waerenga, Manuka, Opunake and Eihana.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info			
105	De	Deane		<p>Submitter would like to see:</p> <ol style="list-style-type: none"> <li>Letter signage to businesses along the SH42.</li> <li>Setting up of a collection bin.</li> <li>Development of a centralised area for parking and toilets etc.</li> <li>Information sign for each bin that tells them:</li> <li>Letter business facilities to allow.</li> <li>Information in Information brochures.</li> <li>Letter money spent on recycling each week.</li> <li>Information on how to recycle correctly.</li> <li>This is an opportunity to be a show case for recycling and waste reduction.</li> </ol>	Option 1: Yes (Council's preference)	Supports more bins being placed in the District.	Option 2: Yes, but just complete stages 1 and 2.		Option 1: Yes (Council's preference)	Submitter would like to know if the money can be used for projects that are currently in limbo because of funding, or not.	<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. We would like to see significantly more recycling bins and the operational feasibility of large-scale planting projects against the time and financial resources. We continue to work for additional opportunities that would allow us to take up our environment and sustainability work programmes in the future. Once the first 2 years of the infrastructure planning process have been successfully completed, we aim to expand the project and will include wetland restoration. All the areas planned to be land that is already publicly accessible.</p> <p>2.1 &amp; 2.2 In the town centre district we have undertaken a number of projects that have been successful in reducing our carbon footprint. We have also undertaken a number of projects that have been successful in reducing our carbon footprint. We have also undertaken a number of projects that have been successful in reducing our carbon footprint. We have also undertaken a number of projects that have been successful in reducing our carbon footprint.</p> <p>3.1 &amp; 3.2 We have a small water recycling system at the Kauri Mill that recycles water into the toilet flush. We have also undertaken a number of projects that have been successful in reducing our carbon footprint. We have also undertaken a number of projects that have been successful in reducing our carbon footprint. We have also undertaken a number of projects that have been successful in reducing our carbon footprint.</p>						
106	Neil	Thames		Provide infrastructure (three wheels) for any new proposed residential areas.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Supports all three stages to be a funding being done.	Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. We have developed structure plans for two growth areas in Wairoa so we can plan infrastructure in a co-ordinated manner, to avoid "ad hoc" infrastructure additions. Across the District, where land is zoned as urban, we aim to provide services where practicable.</p>						
107	James	West		Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Bridges are replaced when replacement is justified as per Waka Kotahi criteria for investment. Currently a proactive bridge upgrade based on condition assessment. Bridge no 128 on Opunake Road is currently programmed for replacement with the other one lane bridge we are not high on the priority list, therefore not considered for replacement in this LP.</p>						
108	Joan	Roberts		<p>Submitter would like to know more about what happens to the waste collected from the voluntary green waste bins.</p> <p>Submitter would like to know who the three back-side collection are, when it is taken, how much it costs and information on how much they collect.</p> <p>Submitter would like to know how the Council will cost out the investigation of its own competing facility.</p>							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Waste generated collected from the Council's 10 green waste residential kerbside collection goes to Pukekohe Organic in Pukekohe for composting. There is no set percentage of amount of food or organic waste that can be mixed with greenwaste, but it should be proportional to the amount of greenwaste in the bin. However, the Council's contractor for kerbside collection and residential management and two other private commercial operators in the South Taranaki District service residents and businesses that do not qualify for the Council's kerbside service. The total value of the kerbside collection contract for the South Taranaki District is approximately \$2.6 million per year. The three private operators are working collaboratively on a feasibility study and business case for a Council-run composting facility somewhere in the region within the next 2-3 years. There are a number of possible options for setting up a composting facility that would accept residential and commercial organic waste. This includes the possibility of working with private operators who are looking to establish such a facility year.</p>						
109	Shirley	Colan	Friends of the Wairoa Park	Submitter would like to know how the Council will cost out the investigation of its own competing facility.							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Option 1: Yes (Council's preference)</p>	Supports all three stages to be a funding being done.	Option 1: Yes (Council's preference)	All items needs a major upgrade.	<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Additional land for residential purposes will be a consideration of the District Plan change process to be undertaken in 2023.</p> <p>2. The Town Centre Master Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>		
110	Neil	Stanger		<p>Develop housing subdivisions in Eihana and Opunake.</p> <p>Develop housing subdivisions in Eihana and Opunake.</p>	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Supports completing all stages to attract more businesses and repair areas that have commercial and light industries, e.g. Clever Road.	Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>2. There is currently considerable demand from businesses planning to establish in the stage 1 and stage 2 areas of the South Taranaki Business Park. All of the land in the Business Park is privately owned by a number of different owners. The Council needs to provide quality infrastructure for all businesses operating within the Business Park. Several residential developments are underway in South Taranaki at the moment and Council teams are working alongside developers to ensure that growth is well managed and infrastructure requirements are understood and met. If residential subdivisions emerge in Eihana, the Council will provide the same level of support.</p> <p>3. The Town Centre Master Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>						
111	Anna	Stanger		<p>Submitter supports a composting facility to South Taranaki.</p> <p>Submitter supports the development of the Business Park in Wairoa however at the same time would like to see a subdivision in Eihana.</p>	Option 1: Yes (Council's preference)	Submitter supports a composting facility to South Taranaki.	Option 1: Yes (Council's preference)	Submitter supports the development of the Business Park in Wairoa however at the same time would like to see a subdivision in Eihana.	Option 1: Yes (Council's preference)	<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. Better planning needs to be done. Rate rebates are also available through the Department of Internal Affairs each year for quarrying operations. The Council also has discounts on various user pays through gate rates.</p>							
112	John	Spurr		<p>Submitter is concerned that the Council and Councilors do not understand the financial constraints that people experience if they are relying on superannuation.</p> <p>Suggests printing a page in the Star on what we can't do in the red and yellow water bins. Suggests having a 'water' like putting out windows of envelopes before water bins.</p>	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stages 1 and 2.	appears in the diagram that Stage 3 is a separate area that could be in development of stages 1 and 2.	Option 2: Yes, but reduce the budget to \$1.5 million per year and undertake the work over the next few years.	If well planned it could be done with \$1 million.	<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. We will follow up the suggestion to put educational recycling information in the South Taranaki Star.</p> <p>2. There is currently considerable demand from businesses planning to establish in the stage 1 and stage 2 areas of the South Taranaki Business Park. All of the land in the Business Park is privately owned by a number of different owners. The Council needs to provide quality infrastructure for all businesses operating within the Business Park. Several residential developments are underway in South Taranaki at the moment and Council teams are working alongside developers to ensure that growth is well managed and infrastructure requirements are understood and met. If residential subdivisions emerge in Eihana, the Council will provide the same level of support.</p> <p>3. The Town Centre Master Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>						
113	Donna	Adams		<p>Submitter would like to see:</p> <ol style="list-style-type: none"> <li>A new playground on the Bowen Crescent playground, one for little children and a big climbing one for older children.</li> <li>Three tennis courts.</li> <li>Ball pitches.</li> </ol>	Option 2: Support Council's proposal to invest in Environment and Sustainability Strategy with changes (please see what changes you would like to see in the comments).				Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>The Council has set aside \$500,000 to repair the playground at Bowen Crescent. A community member has requested an opportunity to fundraise for enhanced and additional equipment. The Bowen Crescent playground is intended to be for younger children, with the newly fenced playground for the older age group.</p> <p>3. Tennis courts are not currently budgeted for. Ball pitches can be considered as part of the Opunake Town Centre Master Plan.</p>						
114	Devin	Murphy		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>Submitter notes that none of the projects identified in the Wairoa District Business Park have been costed out. Because of the submitter does not believe that the \$2m budget will be enough to cover the projects listed. Submitter has the professional consultation has been undertaken with the community.</p> <p>Submitter says that a low budget should be given to the Town to Beach pathway as it will not be used. The Wairoa Town Ball should be developed into a recreation reserve and vegans around plan for the Ball need to be addressed.</p> <p>Submitter also notes that the cost of the final status should be used from the town centre master plan budget.</p> <p>Waka Kotahi should be brought together to discuss the development of the Town Ball.</p> <p>Waka Kotahi should be brought together to discuss the development of the Town Ball.</p> <p>Waka Kotahi should be brought together to discuss the development of the Town Ball.</p>						
115	Janine	Morrison		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>						
116	Debra	Chambers		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. We would normally require our contractors to investigate options as to night not be cost effective/able to provide the service required by collecting the residuals in cost areas. After receiving business applications for roadside collections for Anglem Avenue we have requested our contractor to consider collecting bins on Anglem Avenue. If a vehicle is able to proceed the consentment fees will be commensurate to residents.</p>						
117	Debra	Chambers		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. We would normally require our contractors to investigate options as to night not be cost effective/able to provide the service required by collecting the residuals in cost areas. After receiving business applications for roadside collections for Anglem Avenue we have requested our contractor to consider collecting bins on Anglem Avenue. If a vehicle is able to proceed the consentment fees will be commensurate to residents.</p>						
118	Janine	Morrison	Wairoa R & P Association	<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see a more robust recycling centre similar to New Plymouth.	Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>The Wairoa community will have an opportunity to put input into the activities that take place within the recreation reserve (Dillon Park/Wairoa Town Ball) as part of the development of the master management plan.</p>						
119	Janine	Morrison		<p>1. Please consider all Wairoa Intersections, i.e. roundabouts in Wairoa is growing.</p> <p>2. Footpath / cycleway down to Ohawe Road linking to the beach.</p> <p>3. Sewerage system installed at Ohawe Beach.</p>	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see a more robust recycling centre similar to New Plymouth.	Option 1: Yes (Council's preference)		<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve our carbon reduction and environmental sustainability each year. We would like to see significantly more recycling infrastructure in South Taranaki. However, recycling facilities such as that in New Plymouth cost millions of dollars per year and we have to balance the costs and the operational feasibility of large-scale projects against our time and financial resources. We continue to work for additional opportunities that would allow us to take up our environment and sustainability work programmes in the future.</p> <p>2. We have developed structure plans for two growth areas in Wairoa so we can plan infrastructure in a co-ordinated manner, to avoid "ad hoc" infrastructure additions. Across the District, where land is zoned as urban, we aim to provide services where practicable.</p> <p>3. A roundabout at the Ohawe Beach/Taranaki Road intersection is included in the safety improvement programme budget.</p> <p>The proposal to install a path at Ohawe Beach would need to be prioritised by the Council following consideration of other requests for pathways across the District. Currently there is no additional funding available for the pathways identified in the Town Centre Master Plan budget.</p> <p>4. We have reviewed the options for industrial wastewater for Ohawe. This requires a collection network and a transfer pump to the Wairoa Wastewater Treatment Plant. The costs to install collection and transfer pump are approximately \$2 million, as would be for the three catch ups to the Ohawe sea. We also have the difficulty of significantly increasing covering capacity for the treatment and discharge of wastewater from the Wairoa Wastewater Treatment Plant.</p>						
120	Richard	Wells		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>We would normally require our contractors to investigate options as to night not be cost effective/able to provide the service required by collecting the residuals in cost areas. After receiving business applications for roadside collections for Anglem Avenue we have requested our contractor to consider collecting bins on Anglem Avenue. If a vehicle is able to proceed the consentment fees will be commensurate to residents.</p>						
121	Janine	Thames		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>							<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>We would normally require our contractors to investigate options as to night not be cost effective/able to provide the service required by collecting the residuals in cost areas. After receiving business applications for roadside collections for Anglem Avenue we have requested our contractor to consider collecting bins on Anglem Avenue. If a vehicle is able to proceed the consentment fees will be commensurate to residents.</p>						
122	Judy	Watkins		<p>Submitter would like to see the widening and improving Opunake Rd between Aurora Rd and Stratford Township.</p>	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stages 1 and 2.		Option 3: No, don't support this proposal.	Funding needs to be included in the Town Centre budget.	<p><b>Submitter response for Proposal 1, 2 and 3 required here.</b></p> <p>1. We have a small water recycling system at the Kauri Mill that recycles water into the toilet flush. The cost of installing a system to heat the pools for a short season would be high. The Council considered this, but it is expensive. I would need to consider the same for the pool.</p> <p>2. Staff will be programmed more reflective sessions on the Pool for the upcoming 2023/2024 season.</p> <p>3. There are no plans for any further upgrades at the Ohawe Beach or the lighting at the Pool. This would require additional funding to be approved by the Council.</p> <p>4. It would not be cost effective to have a hot water tank and additional equipment would be required.</p> <p>Having 100m of site provided qualified supervision. The Primary School could provide qualified lifeguards if parents have the required qualifications to be engaged in the use of the pool outside of normal operating hours.</p> <p>Submitter has mentioned:</p> <p>1. &amp; 2. A budget has been allocated for some carpet and vinyl at the Kauri Mill Memorial Hall. Additional funding is required if the options have a number of options and facilities are to be upgraded.</p> <p>3. Fees and charges are a contribution towards the running costs of the hall. A discounted rate is available for community groups (including schools) and individuals. Some charge for use to contribute towards the costs of having and maintaining hall.</p> <p>4. The Council owns many facilities and there are promoting through.</p> <p>5. Fees and charges are a contribution towards the running costs of the hall. A discounted rate is available for community groups (including schools) and individuals. Some charge for use to contribute towards the costs of having and maintaining hall.</p>						

# Extraordinary Council - Reports

Submits Date	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 3 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.6 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waverley, Manuka, Opapeke and Eilham.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
131	Aimee	Boothall		Submitter would like the Council to consider funding for items that require road closures for Christmas and ANZAC parades including public liability insurance.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
134	Dee	Thomas		1. The Council should support residential property expansion in a site larger than is at present to support growth in business. 2. Submitter suggest the Council do their own subdivisions. There are several blocks that could be considered.	Option 2: I support Council's proposal with changes shown on what changes you would like to see in the comments.	Submitter thinks the Council should go only as far as required by law and undertake actions 1, 2 and 5.	Option 1: Yes (Council's preference)	Supports Option 1 and 5. I intend to use the free zone, this will be funding in the end	Option 1: Yes (Council's preference)	The Town Centre should be places people want to go and visitors be attracted to.	Standard response for Proposal 1, 2 and 3 required here.			
135	Joan	Spens	Sustainable Taranaki	Sustainable Taranaki submitted on the following: 1. Climate Change Adaptation Action and Climate Action Plan. 2. Infrastructure Investment. 3. Energy Master Planning Strategy. 4. Town Centre Upgrade 5. Environment and Sustainability Strategy	Option 2: I support Council's proposal with changes shown on what changes you would like to see in the comments.	Much more should be done.					Standard response for Proposal 1, 2 and 3 required here.			
136	Denise	Mills	Chase Property Associates	Submitted the idea of having a walkway on Chase Road	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
137	Denise and Denry	Haley		In addition to the comments regarding the town centre upgrades the Submitter had the following feedback: 1. Complete Street 2. Street Light Review 3. Victoria Park main road fence upgrade 4. Swimming Pools: Having a swimming pool for the school and community. Free for school during school hours - should not have to pay for the holidays. 5. Upgrade and improvements for the Town Hall facilities, which, whether chairs, kitchen, Would it be a big room for use? 6. Other items entering into the town painted out.	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stages 1 and 2.		Option 1: Yes (Council's preference)	Does not support the town centre upgrades until Kapapa is included.	Standard response for Proposal 1, 2 and 3 required here.			
138	Alea	Befly		Submitter would like to see money spent on the roads in Heilston (Lorran payments, verges and footpaths). Suggests removing the grass verges and replacing them with biomass especially on Taranaki Street.	Option 2: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
139	Donna	Berech		Submitter requests that the three one lane bridges along Opapeke Road from Anake Road to the Stratford Road be replaced with the three one lane bridges along Opapeke Road from Anake Road to the Stratford Road.							Standard response for Proposal 1, 2 and 3 required here.			
140	Alan	Murray	Murray Bros Ltd	Submitter requests that the three one lane bridges along Opapeke Road from Anake Road to the Stratford Road be replaced with the three one lane bridges along Opapeke Road from Anake Road to the Stratford Road.							Standard response for Proposal 1, 2 and 3 required here.			
141	Heather	Smith		1. Submitter suggests different funding mechanisms for funding infrastructure. 2. Opposes Council's proposal of Three Waterways.							Standard response for Proposal 1, 2 and 3 required here.			
142	Frances	Blackman	Frances Blackman and Associates	The road works were signed for 118 people who have concerns with items being lit during the night. Daily Road is signed for night use in areas where it is close to the road and the need for a speed limit reduction.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Standard response for Proposal 1 and 3 required here.			
143	Diana and Karly	Howe		The submitter considers the Waverley Town Centre development proposal a higher priority over the Town Centre Parkway. Submitter would like to see the Waverley Town Centre development undertaken first.  Submitter asked how the Council would like the study of each project.  Submitter did not believe \$2 million was likely to undertake the concepts in the plan for the Town Centre Upgrade.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
144	Jane	Boothwaite		Both lanes are too high for scooters and people on foot to negotiate.	Option 1: Yes (Council's preference)						Standard response for Proposal 1, 2 and 3 required here.			
145	Barbara	McIntosh		Submitter would like: 1. A street to be opened for pedestrian use 2. The District pavement programme to incorporate pathways in smaller towns. 3. Pathways from Manuka to Kapapa/Manuka beach with paving planned on the way. 4. Return to multiple pedestrian crossings. 5. Longer daytime pool hours at the Manuka pool. 6. Light food at the strand. 7. More to be done at the town centre. 8. Town hall upgrade to start this year.	Option 1: Yes (Council's preference)	Submitter would like the money evenly distributed between the 3 or 4 towns.  Submitter says that more trees are being planted but suggest יותר trees to well the water flows and trees.  Submitter would like to see results at the town hall.					Standard response for Proposal 1 and 2 required here.			
146	Christine	Mason		Submitter would like to see the following: 1. Decision on footpath off Tapanui Park. 2. Further footpaths on North Street. 3. Submitter is in favour of the development of a commercial competing facility and addressing some of the 40% green waste that is produced.  Submitter would like to see the green waste fees addressed to make that service more attractive and further education programmes.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
147	Denise	Bell	Swanhill High School		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
148	Jane	Urday	SEI National Trust	Submitter strongly supports the proposed Environment and Sustainability Strategy and hopes to see the Council continue to fund and support funding programmes in cooperation. They will endeavour to provide their collaboration with the Council to deliver aspects of the Strategy and achieve positive outcomes for biodiversity on private land.	Option 1: Yes (Council's preference)						Standard response for Proposal 1.			
149	Jane	Sims	Wairarapa Community Board	Submitter would like to see the following: 1. Decision on footpath off Tapanui Park. 2. Further footpaths on North Street. 3. Submitter is in favour of the development of a commercial competing facility and addressing some of the 40% green waste that is produced.  Submitter would like to see the green waste fees addressed to make that service more attractive and further education programmes.	Option 1: Yes (Council's preference)	Council can avoid provide a walking example.  Submitter supports the Carbon Reduction Plan as a feature of the development of a commercial competing facility and addressing some of the 40% green waste that is produced.  Submitter would like to see the green waste fees addressed to make that service more attractive and further education programmes.	Option 1: Yes (Council's preference)	Right to fly in.	Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
150	John	Urday	SEI National Trust		Option 1: Yes (Council's preference)						Standard response for Proposal 1.			
151	Jane	Sims	Wairarapa Community Board	Submitter would like to see the following: 1. Decision on footpath off Tapanui Park. 2. Further footpaths on North Street. 3. Submitter is in favour of the development of a commercial competing facility and addressing some of the 40% green waste that is produced.  Submitter would like to see the green waste fees addressed to make that service more attractive and further education programmes.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Standard response for Proposal 1, 2 and 3 required here.			
152	John	Urday	SEI National Trust		Option 1: Yes (Council's preference)						Standard response for Proposal 1.			
153	Dawn and Kaye	Smith		Please update a regular weekly rubbish collection on Anglian Avenue, Waverley	Option 2: Yes (Council's preference)				Option 1: Yes (Council's preference)		Standard response for Proposal 1.			

# Extraordinary Council - Reports

Submissions Number	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget over \$213,000 each year over the next two years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waverley, Manuka, Opapeke and Eihana.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info		
143	Oliver	Ross	Orms Foundation	Submitter would like the following comments: 1. Thank the Council for their contribution. 2. Requests the Council explore ways to increase its investment (annual grant of \$25,000) to fund the Council for their contribution. 3. Requests the Council work with TRC. 4. Requests the Council notes that the proven and holistic approach of Endurochroos support various Council priorities. 5. Requests the Council note the information about the current situation with Endurochroos locally, regionally and nationally.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		This submission has been referred to the Funding Co-ordinator - Christine Davis.					
144	Oliver	John			Option 1: Yes (Council's preference)		Submitter would like the Council to include EV charging stations and help our farmers switch to EV heavy vehicles and include support for new fuel on in Orms and a mapping of the sites around the off-roaders.	Option 3: Just complete stage 1	Not enough information about the expected revenue an investment and on-going business and operations of future business and any benefit of revenue within the Council's parameters.	Option 1: Yes (Council's preference)	Essential to include EV charging mapping including inter-regional and cross-regional.					
145	Jack	Dwyer	Papa Community Board	Thank you for your response for the Council's leadership in the area of the environment and wellbeing of the people which would align with the environmental progress the Council has already started in Papa with the restoration of the riverside at York Street. Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.				
146	Janine and Greg	Benson	Baylors	1. As what I'm looking before starting money on new projects. 2. Station - too small, suggested area for 2000. 3. Station - that points people in direction of things to see. 4. Signage - clear way of things as a first experience to keep the front of their shops tidy or possibly get up to standard. 5. Free parking for people to use. 6. Free parking should always be managed and ones that don't need too many leaves. 7. Encourage a car park for people to manage and not too large.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.				
147	Janine	Wesselska			Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
148	Jack	Ward			Option 1: I support Council's proposal Environment and Sustainability Strategy with changes given as what changes you would like to see in the comments)	and not Option 4			Option 2: Yes, but reduce the budget to 1.5 million per year and undertake the work over the next five years.	Option 1: Yes (Council's preference)	Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
149	Hege	Yvonne	Opapeke Community Emergency Trust	Request for financial support and guidance with several teams to train their team can provide and meet the needs of the community in a civil defence event.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.				
150	John and Sarah	Heper		Please supply regular weekly rubbish collection on Anglem Avenue, Waipa	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
151	Jack	Maritch	Papa Rugby and Sports Club		Option 1: Yes (Council's preference)				Option 2: Yes, but reduce the budget to 1.5 million per year and undertake the work over the next five years.	Option 1: Yes (Council's preference)	This is needed because the organisation has, that the additional budgeted money, should be invested in community assets for the long term benefit of these communities. Specifically for Papa they would like the Council to invest in the club's proposed sports hub and community space					
152	Janet	Went		Weekly rubbish bin collection for Anglem Avenue, Waipa.	Option 2: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
153	John	Heaven	Opapeke Sports Reserve Trust	Submitter comments - highlighted the Trust's struggle to have a large enough pool of volunteers.	Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
154	Jack	Went			Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
155	Jack	Went			Option 1: Yes (Council's preference)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
156	John	Thomson		Submitter would like to see: 1. Another speed bump along the street, Orms. 2. Support for public toilets in Orms. 3. Continue the parking and charging of bikes in the Orms Residents Association.	Option 1: Yes (Council's preference)				Option 3: Just complete stage 1	Option 3: Yes (Council's preference)	Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
157	Michael	Sam	Sport Taranaki	Submitter supports the following: 1. Ongoing maintenance and renewal to Community Facilities and Services. Sport Taranaki supports the retention of Community Rates along with Green Precipitation and Cold Cell aquatic rates. 2. Continuation of the pathway programme as well as the consideration of safe and connected active transport routes within existing projects and other urban design planning including the Town Centre Upgrade. 3. Address the measures proposed to protect the environment, minimise waste and begin to respond to climate change. Actions that retain the quality of water resources and the public's access to beaches are important.  Submitter also recommends the following: 1. Continue the investment in the Regional Strategic Approach. 2. Consider how the Council can support local solutions to sport and recreation challenges or needs that emerge. 3. Consider introducing a Community Services Contributor rate for aquatic facilities. 4. Consider equitable hire and charges across sports centres. 5. Consider working collaboratively with Sport Taranaki and other key stakeholders to develop a community facility solution for Manuka that is both acceptable to the community and aligned to the Regional Facilities Framework.	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes given as what changes you would like to see in the comments)				Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.			
158	Heidi and John	Went		Submitter requests that the three sites being bridge along Opapeke Road from Access Road to the District boundary are upgraded and the used as follows:	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes given as what changes you would like to see in the comments)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. A utility platform installed in the area of the town What serving two purposes - retaining the bank and providing a safe recreational area for people to use. 2. New footpaths that incorporate several sports clubs in town. Tennis Courts need to be upgraded and put back to the original competition level. Tennis court surface sports courts could be marked out on a new indoor facility. Building to host events. 3. Installation of the Star Bus in Waverley. 4. Make it incorporated into our town upgrade. 5. A review of the Council owned sections in Papa and Waverley to use if they are viable as residential sections to sell to allow the change. Support Council's continued progress with walkways and cycleways.					
159	John	Went	4. Environment a high-priority Trust	1. Upgrade maintenance and renewal to Community Facilities and Services. Sport Taranaki supports the retention of Community Rates along with Green Precipitation and Cold Cell aquatic rates. 2. Continuation of the pathway programme as well as the consideration of safe and connected active transport routes within existing projects and other urban design planning including the Town Centre Upgrade. 3. Address the measures proposed to protect the environment, minimise waste and begin to respond to climate change. Actions that retain the quality of water resources and the public's access to beaches are important.  Submitter also recommends the following: 1. Continue the investment in the Regional Strategic Approach. 2. Consider how the Council can support local solutions to sport and recreation challenges or needs that emerge. 3. Consider introducing a Community Services Contributor rate for aquatic facilities. 4. Consider equitable hire and charges across sports centres. 5. Consider working collaboratively with Sport Taranaki and other key stakeholders to develop a community facility solution for Manuka that is both acceptable to the community and aligned to the Regional Facilities Framework.	Option 1: I support Council's proposal Environment and Sustainability Strategy with changes given as what changes you would like to see in the comments)				Option 1: Yes (Council's preference)		Submitter would like to see: 1. Extraordinary Council - Reports

Submits Sign Number	First Name	Last Name	Organization	Subject/Issue	Proposed 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposed 1: Comments	Proposed 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposed 2: Comments	Proposed 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Fife, Waverley, Marisa, Opawa and Eitham.	Proposed 3: Comments	Management Response	Accept	Reject	Request more info	
151	Re	Antonia		Children ask if there anything the Council can do to support housing and the lack of affordable houses	Option 1: Yes (Council's preference)	Children require fruit trees to plant in the trees that are planted.	Option 1: Yes (Council's preference)	Proposed that this does not empty out the trees.	Option 1: Yes (Council's preference)		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. For our long-term climate change programmes, we will only use re-sourced natural plant species that are suitable for the ecosystem type and location. To help to create habitats and corridors, we are also investigating the potential establishment of community food gardens in public areas where there are community groups who are willing to grow these projects. 2. The support for the South Tararua Business Park has become evident recently with significant demand coming from businesses wanting to establish themselves on Kerry Lane and Fitzgerald Lane. STC is working with developers currently and the aim is to design and install infrastructure that meets current and future needs and also fits with developer requirements as closely as possible. Being environmentally and industrial aware, the South Tararua Business Park will cater to industry that predominantly isn't taking place in the CBD currently. The business that currently plan to establish themselves in the area are either relocating from other regions, or expanding their operations having already found tenants for the premises they will be vacating. Additional land for residential purposes will be a consideration of the District Plan change process expected to be undertaken in 2022.	Accept			
154	ery and rose	egian			Option 1: Yes (Council's preference)			Keep areas level as land	Option 1: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
155	ee	erthiana		1- Would the pathway from Oshaw Street to South Road. 2- Would it be something done about Oshaw Street in Oshaw as it is eroding badly in some areas.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
156	bernie	Mrs	Oshaw Progressive Society	1- Consider erosion in Oshaw particularly for Oshaw Terrace and Oshaw Terrace. Ask that Council investigate options to protect Oshaw from coastal erosion.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
157	Robert (John)	John		1- Submitter supports a public lane alongside the Oshaw Beach Path. 2- Asks that Council continue with work and planning around the lane.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
158	John	Henry		The Trust is asking the Council to provide support and agree to underwrite the project, which is stage two of the proposed building to house and display the Museum's collection.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
159	Richard	Healey	Timaru Primary School	The School is asking that the speed of traffic is reduced to 30km/hr on the residential road past the school and County Drive. Move the 70km sign further along Glover Road towards the industrial area so that it is not visible to motorists and that they have passed the school. The pedestrian crossing and electric crossovers warning sign placed either side of the school on Glover Road. We would like better signage at the traffic lights to indicate who goes way. With the increased residential and educational school traffic using County Drive as a thoroughfare, we ask that speed bumps be placed across County Drive to slow traffic. Place a barrier down a section of the Centre line of County Drive from the back access to The Footing to prevent cars being U-turns.	Option 2: I support Council's proposed Environment and Sustainability Strategy with changes being set out in the comments.	Provide examples of what households can do to fit-forably implement environmentally sustainable options in their yards, set, or other consent recycling centre.	Option 3: Just complete stage 1.	Suggests Kapaunga or Eitham, closer to rail.	Option 1: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
170	Roger	Scott		1- Found community parks with amenities from Midair works. 2- Smaller recycle bins and larger general waste bins - not much can be recycled any more.	Option 2: I support Council's proposed Environment and Sustainability Strategy with changes being set out in the comments.	Provide examples of what households can do to fit-forably implement environmentally sustainable options in their yards, set, or other consent recycling centre.	Option 3: Just complete stage 1.	Suggests Kapaunga or Eitham, closer to rail.	Option 1: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
171	Heleen	Collegedale		1- Fitzgerald Lane needs stormwater system. 2- Fitzgerald Lane needs widening. 3- Roundabout on Fitzgerald Lane and Waikato Road.	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stages 1 and 2.		Option 1: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
172	John	Richard		Any updates and address the Opawa Local Plan that is submitted to the Council.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>				
173	John	Antoniene	Opawa (Central) Community Board	1- Support increased opportunities to build partnerships with the community from the Council to develop and implement the Opawa Beach Master Plan. 2- Support general updates to Opawa beach signage. 3- Encourage more investment into creating the Tararua District particularly pedestrian access and for walking and cycling along the beach. 4- Support general updates to the Tararua District Ward. 5- Support the stormwater drains are cleaned every six months in Opawa, Marisa and Eitham. 6- Requests that funding is provided towards annual maintenance of the Opawa High School and annual maintenance of the Marisa walkway of \$1,000 per annum. 7- Requests the Council investigate more suitable options for Opawa High School Marisa Bus Stop area. 8- 10% reduction in a year cycle sign in Opawa. 9- Long term planning for cyclone hits to New Plymouth via Kaitiaki. Opawa - Pukekohe - Wairoa. 12- 10% reduction in a year cycle sign in Opawa. 13- Request the Council investigate more suitable options for Opawa Community Centre. Funding to support housing upgrades at the Pukekohe area. 14- Funds that the Council funds before sign up to the beach and walking sign-up, playground, sports fields, events, and location of historical and cultural significance. 15- Investigate if roads within the area are likely to be replaced or replaced. 16- Council to investigate playground options in the Opawa area. 17- Council to investigate playground options in the Opawa area. 18- Council to investigate playground options in the Opawa area. 19- Council to investigate playground options in the Opawa area. 20- Encourage Council to purchase a building in Opawa to store historical artefacts. 21- Investigate options to relocate the Midair Domain model. 22- Support updates to both Marisa Trail and Sports Complex. 23- Engage with community and better support to maintain berm in Marisa and Pukekohe. 24- Ask the Council to consider funding road closures for annual events in and communities such as ANZAC parades and Christmas parades.	Option 1: Yes (Council's preference)	Propose that the general waste and recycling options be prioritised. Connectivity to the Opawa beach and aesthetic value options are prioritised.	Option 1: Yes (Council's preference)	Propose that the general waste and recycling options be prioritised. Connectivity to the Opawa beach and aesthetic value options are prioritised.	Option 1: Yes (Council's preference)		1. We will review our Environment & Sustainability Strategy's new work programmes to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. For our long-term climate change programmes, we will only use re-sourced natural plant species that are suitable for the ecosystem type and location. To help to create habitats and corridors, we are also investigating the potential establishment of community food gardens in public areas where there are community groups who are willing to grow these projects. 2. The business that currently plan to establish themselves in the area are either relocating from other regions, or expanding their operations having already found tenants for the premises they will be vacating. Additional land for residential purposes will be a consideration of the District Plan change process expected to be undertaken in 2022.				
174	Don and Maureen	Wright		1- Three Rivers Return - Responsibility and management of water to remain with STC. 2- Need second reservoir for Opawa river - residents have been asking for better water since 1999 but no progress so far. 3- A lot of \$200,000 has been spent for a generator to support the town in a local defence emergency. 4- Request Council puts more effort into beach and charming and safety around our main sites. 5- Monitor use of Opawa beach for enjoying. 6- Trackers with trailers need to go more slowly through the middle of town.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 2: Yes, but reduce the budget to \$1 million per year and undertake the work over the next five years.	Option 2: Yes (Council's preference)		<b>Revised response for Proposed 1, 2 and 3 required here.</b>			
175	John	Wayne	Bethel House	1- Urge the Council to consider any increases in costs and regulations and the impact to smaller businesses. 2- Request the introduction of a Business Development Manager and the proposed Business Development Team with the Council. 3- Support the focus on Marisa River centre, however highlights importance to encourage traffic down from the South Road/Three Street intersection. 3- Strongly request for a road closure on Oshaw Road/ Fife Road intersection. 4- A bike lane to be included close to the on the side of the Waikato C/D. Council to consider more electric car charging sites in town. 5- If there is to be a bike lane, to think about the impact on cars and what we can do for them as provided.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	<b>Revised response for Proposed 1, 2 and 3 required here.</b>			

# Extraordinary Council - Reports

Submissions Number	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Pukekohe, Waiverua, Manuka, Opakapeka and Esham.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info	
176	Jill	Bowl	Manuka Primary School	1. Funding being towards priority projects such as the strengthening and refurbishment of the Manuka & Opakapeka Memorial Town Hall (if any funds are required for this project). 2. Council to consider extending the existing road reserve on the Manuka swimming pool site with the end of school lane. 3. ...	Option 1: I support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy. I would like to see in the comments.	Hope that the Council is able to investigate the new research in the building of commercial competing facility such as underground parking system.				1. I will review our Environment & Sustainability Strategy's new work programmes to ensure we improve on our climate change, waste reduction and environmental sustainability targets each year. The proposed regional council rate, We are investigating the cost and benefits of adding greenways and foot waste collection to our rubbish waste and recycling service. We will continue to deliver sustainability and resilience workshops for residents and communities to help educate people on how to make more sustainable choices in their lifestyles.					
177	Jae	Admitt	Kaponga Rugby Club	1. Victoria Park needs lighting upgrade. With night vision, safety and animals using these facilities will be impacted. 2. Fence around the Park to stop dogs with owners and those in. 3. Carpark at Victoria Park needs to be fully covered with upgrade of the vehicles in Park on a Saturday. 4. Tables and rubbish facilities need a major upgrade to handle function capacity. 5. Obstructed gates at Victoria Park are a must of a city with broken concrete needing to be replaced.	Option 1: I support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy. I would like to see in the comments.		Option 1: Yes, complete all 5 stages (Council's preference).		Option 2: Yes, but reduce the budget to \$1 million per town and allocate the work over the next five years.		1. Initial discussions have been held with Council staff and Sport Taranaki to assist with investigations for possible future lighting at Victoria Park, Kaponga. A lighting design and costings would need to be prepared before proceeding with any plans. 2. Fences to upgrade are planned across the District in the coming 5 years so that these bins will have options for recycling and glass alongside general waste. We will also continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles. 3. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
178	Long	Revan		The Council needs to support developers of residential subdivisions by providing the necessary infrastructure. Council should ensure the rules for road subdivisions or at least consider each request sensibly in areas close to town and in some to residential where possible.	Option 2: I support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy. I would like to see in the comments.	Do what the law requires in terms of the action and create change parts of point 1 & 2 of the proposal.	Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).		1. There is strong community support to implement all the projects in the Environment & Sustainability Strategy. As a community, we will ensure we continue to improve our environmental sustainability targets each year. We will also continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles. Additional funding for residential projects will be a consideration of the District Plan change process expected to be undertaken in 2025.				
179	Jess	Hay		1. Look at rubbish bins in the Hawera town/ CBD. The current bins are old and do not work properly. They are not proper suited to the area and danger of rubbish generated by food businesses and consumers. Council needs to provide large square bins as well as couple of recycling bins through town which allow glass and plastic.	Option 1: I support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy. I would like to see in the comments.		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).	Agree, supporting appropriate rubbish bins in the town centres.	1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We support better transport options for sustainable transport, and will continue to work with Taranaki Regional Council and other stakeholders to move towards more sustainable future transport options for our region and District. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
180	Griffiths and Ella	Ellis		1. Support the submission of Manuka House and Family. 2. Support the development of the Manuka House into a recreation reserve with native planting. 3. Questions the need for a walkway from the town centre to the beach. 4. Support ongoing funding for the Manuka House. 5. The above cost of the site sculpture project should not be fully funded from Town Centre Master Plan budget. 6. Mutual art scheme for the development of the Manuka House.	Option 1: I support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy. I would like to see in the comments.		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).	1. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.					
181	Conrad	Moat	Manuka Transport Trust	1. Submitters list a range of actions they wish the Council to undertake this year, over 5 years and over 20 years in regards to sustainable transport - not include private side street cars, pedestrian parks and relevant changes, reduce speed limits, re-evaluate staff, improve road layouts, on demand public transport, use alternative fuel sources etc (listed in road submission).	Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).	Must be done properly keeping the environment clean, safe, convenient etc. Make a structure from SH1	Option 1: Yes (Council's preference).		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We support better transport options for sustainable transport, and will continue to work with Taranaki Regional Council and other stakeholders to move towards more sustainable future transport options for our region and District. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
182	Juliana	Smith			Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).	Must be done properly keeping the environment clean, safe, convenient etc. Make a structure from SH1	Option 1: Yes (Council's preference).		Road layout improvements are considered on a safety basis and planned based on priority.				
183	Helene	Ind			Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).		1. The support for the South Taranaki Business Park has been evident recently with significant demand coming from businesses wanting to establish themselves on Kerry Lane and Fitzgerald Lane. 2. The Council has no plans or budget to undertake work on the Opunaki Lake. 3. The Council has no plans or budget to undertake work on the Opunaki Lake. The Town Centre Master Plan are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
184	Ben	Marshall			Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).		1. The Council has already made the decision regarding 2. Karama's landscaping and the demolition of the existing buildings to make way for the facility. At this stage of the project, it would be very costly and impacted to change the location for the use of the existing buildings.				
185	Angus	Belgham	St Helens Community Board	1. TCHC requires a bike rack to be installed in town particularly where the District bins are being placed. 2. Funding should be allocated towards a roundabout on Oliver's/Taranaki Road/Intersection. 3. Investigate options for Oliver Road/ Private Street intersection. 4. Roundabout on Oliver's/ South Beach Intersection. 5. Hawera bike/cycle track upgrade.	Option 1: Yes (Council's preference).	Need for electric car charging options to be more readily available in the town centre. Promote eco friendly and sustainable alternative transport. Positive message campaign regarding rubbish disposal.	Option 1: Yes, complete all 5 stages (Council's preference).	Subsidies provided by rate payers need to be kept a minimum.	Option 1: Yes (Council's preference).		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
186	Andrew	Thompson	Opunaki High School	Submitters request parkour sports/fitness equipment at Opunaki.	Option 1: Yes (Council's preference).	Need public glass recycling bins.			Option 1: Yes (Council's preference).		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
187	Jan	Milne			Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
188	Matt and Lucy	Thompson		1. Submitters request urgent upgrade and widening of Baily Road. 2. Rubbish collection to be provided at Pukekohe Avenue. 3. Support Street CCTV to be opened at the light house.	Option 1: Yes (Council's preference).		Option 1: Yes, complete all 5 stages (Council's preference).		Option 1: Yes (Council's preference).		1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
189	Caroline	Young	St Helens Community Board	1. Submitters request that the Building Water Councils be Contributed to Section Making Policy to be revised to show the partnership that is being developed. 2. Ngati Rauiri recommends that an additional community group be created that specifically reflects the Council and its developing partnership, such as an approach may better reflect and provide better strategic connections to the position in the long term plans including environmental sustainability and social equality sections. 3. Ngati Rauiri recommends that a specific work programme be committed to the Long Term Plan for the 'Newer Waterworks Park' in accordance with the actions currently completed in the Hawera Waterworks Park Study commissioned by the Council. 4. Ngati Rauiri recommends a specific work programme for the Park Street Waterworks Pumping Station to find a long term solution to prevent any further discharge to the Pukekohe River of wastewater within the next 5 years of the long term plan. 5. Ngati Rauiri recommends that a commitment to improve road safety and access to Baily Road be undertaken as part of the Housing and Hospitality Capital Projects Programme carried out in the Park Long Term Plan.	Option 1: Yes (Council's preference).					1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.					
190	Hay	Heater		Submitters request funds be allocated to Opunaki Road from Kauru Road at there are 2 one-lane bridges along this stretch.	Option 1: Yes (Council's preference).						1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
191	Jan	Wendell	Waikarepa Rural Caravan	Submitters request funds be allocated to Opunaki Road from Kauru Road at there are 2 one-lane bridges along this stretch.	Option 1: Yes (Council's preference).						1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.				
192	Jan	Wendell	Waikarepa Rural Caravan	Submitters request funds be allocated to Opunaki Road from Kauru Road at there are 2 one-lane bridges along this stretch.	Option 1: Yes (Council's preference).						1. Our Environment & Sustainability Strategy contains new work programmes that will be reviewed on an ongoing basis to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe and green transport alternatives are crucial if we are to meet our national climate change commitments. We will continue to deliver sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their lifestyles and reduce littering and illegal dumping. 2. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities for what any available budget will be spent on and this includes upgrading the rubbish bins and providing recycling bins.

# Extraordinary Council - Reports

Submits Date	First Name	Last Name	Organization	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next two years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Fife, Waverley, Morningside, and Eltham.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
05/06/2024	Maria	Smith		1- Reviewing signage and facilities are not fit for purpose and require an overhaul. 2- Fences along the road are not safe and require upgrading.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	Submitter would like to see further consultation on the position of the 22m wall to be spent. There is a greater priority on improving the Waverley Town Park in partnership with us and creating a pathway rather than having a pathway to the beach. A site plan to be included of Fife Park, Waverley.	<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>1- An estimate agreed at Waverley Beach Camp is scheduled to be undertaken in Year 2 of the Plan, in the past 3 years the power circuits around the beach have been upgraded as a new playground installed.</p> <p>2- The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities. The Waverley Town Park, including the park and public paths, are the focus of the next work plan. All proposals at Waverley Beach, the focus of the work plan, are covered by the Business and Development Plan. All decisions on the work plan will be made in consultation with the community. A Business Management Plan is being developed, which will include Waverley Town Park and will be completed in line with the Business Plan.</p>			
07/06/2024	Editha	Dever		1- The Council should be focused on increasing waste generation rather than recycling. 2- In the draft Environment and Sustainability Strategy the Council has stated "We want to radically improve our environmental sustainability and climate change into something we do." However in the Draft Long Term Plan it is difficult to find evidence of the 4.5 Tonne being integrated into any other aspects of the plan for example in the plan for the new Business Park there is no mention of sustainability or environmental protection and enhancements.	Option 2: I support Council's proposed Environment and Sustainability strategy with changes (where we will change) you would like to see in the comments).	Submitter believes Council should be spending more on environmental and sustainability initiatives. The Council has acknowledged the urgency of climate change and biodiversity loss. £121,500 a year will not be enough to do what is needed to see the progress being made.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. The Strategy will be reviewed September and 1 July 2025 and that why it is not yet established across all projects in this LTP. However, one of the key actions in the Strategy is ensuring every new project from an environmental sustainability and climate change perspective, and will be integrated into all decision making and project management processes from July 2025. Central Government will be implementing large scale transformational changes to waste management in the next years, including modernisation of Council-run kerbside collections, kerbside collection of green and food waste in Council-run kerbside collections, container reuse and recycling, and kerbside single use plastics, among other initiatives. We are also looking at packaging and single use containers across the legislation change. All Council-run waste and facilities have waste reduction projects and we're going down over 80% of waste from our buildings and events. The proposed regional commercial composting facility is operational. The Council will continue implementing a kerbside food, green and organic waste collection across the District. We would like to do significantly more work in the environmental sustainability work programme, so we have to balance project costs with the operational feasibility of large scale projects against our kerbside food and financial resources. We continue to work for additional funding opportunities that could allow us to take on our environmental and sustainability work programmes. We will also continue to deliver a number of sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their homes. Sustainability performance standards will be considered as part of the changes to the District Plan that are required to enable the future zoning and performance standards for the Business Park.</p>			
08/06/2024	Deborah	Smith		1- Brighton on Waverley CBD and the water tower. 2- Old buildings need to have their exterior refreshed to include in green.	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stage 1 and 2.	Please hide all industry away behind tree screens	Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>2- There is currently considerable demand from business planning to establish themselves within the stage one and stage two areas of the South Taranaki Business Park. As the Council completes the infrastructure for stage 1 and 2 over the next three years we will assess the viability of converting to stage 3. The converted areas in stage 3 of the development and include tree screens designed to mitigate any visual impacts for residents in close proximity.</p> <p>3- It is proposed that the redevelopment of Waverley continue with a budget of \$4 million over the next 5 years.</p> <p>4- The Council has a parking revenue fund available for private building systems to apply for to improve the appearance of their buildings.</p>			
09/06/2024	Russell	Smith		1- The time between trees upgrading should be halved - the last upgrade was undertaken in 1995. In 2022, 2- There appears to be no plan with more representative plants. 3- More plants developed around Eltham - including a Cemetery central walk. 4- Provide a memorial wall and garden at Eltham Cemetery. 5- Provide more water taps within the Eltham Cemetery to support Māori Whānau.	Option 1: Yes (Council's preference)		Option 2: Yes, but just complete stage 1 and 2.		Option 2: Yes, but reduce the budget to \$1 million per town and undertake the work over the next five years.		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>1. There are no plans to include a cemetery street project, with budgets allocated for specific pathways identified in the town centre masterplans only in this stage.</p> <p>2. There are no plans to erect a memorial wall at Eltham Cemetery and this would require additional funding.</p> <p>3. The current water supply in a cemetery road tank, so it would not get sufficient pressure or flow in additional taps around the cemetery. There is one existing tap on the outside of toilet building that supports irrigation.</p> <p>4. We would normally require our contractors to investigate options as it might not be cost effective/feasible to provide the service requested by collecting the "cost" in road use. After receiving business applications for kerbside collection for Angles Avenue we have requested our contractor to consider collecting bins on Angles Avenue. If a service is able to proceed the commencement date will be communicated to residents.</p>			
09/06/2024	Anna	Scouting	Regional Farmers	1- Support Council's focus on maintain water infrastructure and training skills relevant to a minimum. Support Council's use of irrigated water for water, wastewater, cooling and kerbside collection services. 2- Support Council's use of irrigated water for water, wastewater, cooling and kerbside collection services. 3- Council to be mindful of rural businesses when identifying sites. 4- Support funding allocated in the Infrastructure Strategy on cooling. 5- Support the Council introduce a forestry dividend to help with the maintenance of rural forestry.	Option 2: I support Council's proposed Environment and Sustainability strategy with changes (where we will change) you would like to see in the comments).	Support the planting initiative however request Council find alternative funding other than the general rate. Farmers that Council are intending having carbon reduction objectives before tripping them from the community.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. We have received the Billon Tonne funding for our reforestation project, which will ensure the rate as impacted as little as possible. We are awaiting further advice from the Government on the Rural Forestry 2025, which will be funded by the Government. We are currently working on the implementation of the 2024 plan. However, we will continue to have direct with Regional Farmers and affected businesses via the NPS to be published and once we know what we are required to implement. Our strategy does not include measures on forestry in the community and we do not have a mandate to do this. The carbon reduction measures related to the Strategy are either our own initiatives/programmes or refer to national targets required by central Government through the Climate Change Response (Direct Action) Amendment Act 2023. All climate change mitigation plans that are produced in the future will go through a robust public consultation and co-design phase, and will be delivered by either Council and/or community organisations in the area from our NZ, the proposed Managed Retreat Act and other environmental legislative reform currently underway at central Government to replace the RMA.</p> <p>2- The cost to design and build all three stages of the Business Park over nine years is \$11 million. Stage 1, which is already underway is \$3 million. Stage 2 (2023-2024) would be \$4 million and Stage 3 (2025-2030) is \$4 million. The Business Park will initially be funded by taking out a bank. Over time, the Council will receive financial contributions from business establishing in the area to help repay the loan. This means the impact on rates to fund the business park will be minimal (Stage 2 would be an extra 3 cents a week for the average urban household).</p> <p>3- To manage the LTF, the Council has Statement of Investments Policy and Objectives (SIO). One of the priorities of the fund is to maintain real value of the LTF with regards to inflation and create investment fluctuation reserves. As of 31 March the LTF has \$12.6 million in inflation fluctuation reserves.</p> <p>4- It is a P.A.</p>			
09/06/2024	Anna	Roland	Western Institute of Technology at Taranaki (WITT)	1- Support Taranaki DCC aspirations and objectives on behalf of WITT to enable Government. 2- Support the merger of the High School and Intermediate and other such campus become an eco campus. 3- Support the Taranaki. 4- Support Council's vision for an innovation hub. 5- Support South Taranaki Government to develop their innovation. 6- Partner with WITT, the TSA TSPCC charitable trust, DCC, WITT and the local foundation in establishing a National Centre for Sustainability and Biodiversity. Support investigation in an alternative for Connector bus. 7- WITT invites the South Taranaki District Council to support its recommendation to the Taranaki Regional Council to access the Connector bus service and schedule. 8- WITT invites South Taranaki residents to access the different courses at different sites in the Wairarapa which may be available at the WITT Taranaki campus.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. We are strongly aligned with the Taranaki 2050 vision and aspirations. We would be open to further discussion on the potential for establishing a National Centre for Sustainable Tourism and Biodiversity, and whether this could be Taranaki in good position to be the alternative energy and sustainability centre of excellence for NZ. The area where the Waverley Intermediate and Waverley High School are located belongs to the Ministry of Education and the future of this will be decided by the Ministry of Education. Community consultation will be undertaken on the proposed National Centre for Sustainable Tourism and Biodiversity. WITT has provided to send towards the establishment of an Innovation Hub in Waverley and we look forward to collaborating on the project moving forward. Recent work has focused on the proposed transport options across the region. The South Taranaki District Council provides input through the Regional Transport Committee and the South Taranaki.</p> <p>8. &amp; B. While the Taranaki Regional Council is responsible for providing transport options across the region the South Taranaki District Council provides input through the Regional Transport Committee and the South Taranaki.</p>			
09/06/2024	Anna	Smith	Waverley Primary School	1- Seek that the Council considers increasing the implementation of the Kaitiaki Learning Field - replace the covers with solar blankets. Also adding additional tips like a bin, a recycling cover table and garden table available - refers also refer to the District masterplan during the session. Also note that the post was to be opened until 1pm when the post was closed early several times - if this is to be the case for future this should be updated on the Facebook page.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>We have an oval heating system at Kaitiaki Road outside the oval community park, which looks normal under the building park. The cost of installing a system like the posts for the Waverley oval summer season would be high. If the Council considered this for future, it would need to consider the same for all the oval parks.</p> <p>2. The Council has had a meeting with the school to discuss some accessibility options. They are considered dangerous within the aquatic library following drawings in their plans. The operational costs used by the submitter will be addressed with staff.</p>			
09/06/2024	Jan	Smith		STCC to play an important role in increasing understanding and education for the Fifean youth to become more knowledgeable about matters of conservation and historical concerns relating to Māori / iwi / hapū relations. For many of us, this has been missed in our earlier education leaving many out of the loop in this progression towards a concern understanding of our use as an industrial country in the modern age (encourage the STCC, through its Community Development Department, to take the initiative to engage for example, workshops and the like, using a host of tools to assist in encouraging positive attitudes in this education by facilitating the local availability of opportunities for this supported learning and growth.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>The Council is working closely with us to develop a Council Partnership Strategy and address some of the points raised by you. For example the historical places (to actively promote) in partnership with Māori activities within the District, to engage an iwi liaison officer, develop a joint education strategy on Māori / iwi / hapū and more meaningful community engagement.</p>			
09/06/2024	Jan	Smith		1- Submission to see the Waverley Town Park completed into a better bush, including a cycle path. 2- We need to be mindful of the limitations of the innovative outdoor project budget, the need for protection and of the best choices that will have to be made.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>1. &amp; 2. The Town Centre Master Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>			
09/06/2024	Jan	Smith		1- In doing this a 100m wide area - 100m wide has been shared of Council interests.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Agree the proposal as not a net loss of space from the community has been incorporated.</p>			
09/06/2024	Jan	Smith		1- Can something please be done about the speed limit signage - there is no speed reduction sign at the intersection.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>2024 the Council commissioned a feasibility study on a South Taranaki Business Park. Suitable land for industrial purposes was identified and outlined in Opaki, Morningside, Fife, Waverley, Eltham, Northcote and Waverley. The Waverley Road mixed use area in Waverley was deemed to be the most suitable location for a commercial/retail industrial area of the study, providing a viable succession of businesses and opportunities throughout the District. Although there is currently another business park underway, a further significant commercial and residential projects are happening within individual development Districts with the STCC are supporting.</p> <p>2 &amp; 3. A. Support from the community was sought as the Town Centre Master Plans are developed. These are high level documents and further consultation will be undertaken with the communities to confirm their priorities.</p>			
09/06/2024	Charlotte	Reynolds		1- Should be set out buildings in Eltham painted and restored. 2- Would like to see self service books on site return at Eltham library.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>The submitter's concern about the 'service part' of Governor Road is noted. This could be addressed as part of the upcoming speed limit review - a lower speed limit could assist with making a section of the road safer.</p>			
09/06/2024	John	Smith		1- Would like to see a cycleway from Opaki to Waverley.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Planned projects are planned across the District in the next 5 years to see that there are more options for recycling and plan through general waste. Another key project in the Strategy is the proposed regional commercial composting facility that could divert up to 40% of all District waste from landfill. This facility will be built within the town, and organic waste collection across the District. We would like to do significantly more work in the environmental sustainability work programme, so we have to balance project costs with the operational feasibility of large scale projects against our kerbside food and financial resources. We continue to work for additional funding opportunities that could allow us to take on our environmental and sustainability work programmes. We will also continue to deliver a number of sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their homes and businesses. Active, safe, and green alternatives for transport are crucial for us to meet our national climate change and resilience objectives.</p>			
09/06/2024	John	Reynolds		1- There is a real need for electric charging points available in town. 2- Bike racks to be placed in the town centre to support the 'Electric' theme. 3- Covered outdoor seating available at the Opaki & Morningside. 4- Provide messaging about recycling rubbish and regarding the environment. 5. Permanent covered outdoor seating / 'Electric' Road interventions. 6. Feasibility study on a roundabout at Opaki Road and Prince Street intersection. 7. More youth activities suggested at bike track. 8. Planting at the entrance to Morningside. 9. More support across the area.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Our Environment &amp; Sustainability Strategy contains a range of new work programmes that will be reviewed to ensure we continue to improve on our climate change, waste reduction and environmental sustainability targets each year. Active, safe, and green alternatives for transport are crucial for us to meet our national climate change and resilience objectives and will investigate and support the installation of further EV charging networks being placed in the towns throughout the District. We will also continue to deliver environmental sustainability and resilience workshops for residents and communities every year, to help educate people on how to make more sustainable choices in their homes and businesses and through the Strategy.</p> <p>2. There is a EV charging and at the Morningside. The Council has successfully applied for funding for EV chargers to be installed in Waverley and Opaki. Other external funding options will be explored as they become available for further sites in Waverley are required in the future.</p> <p>3. Feasibility study on a roundabout at the Opaki &amp; Morningside intersection has been completed and the study has been completed. This study will be completed and the study will be completed and the study will be completed.</p> <p>4. A roundabout at the Opaki &amp; Morningside Road intersection is included in the safety improvement programme budget.</p> <p>5. There is difficulty with installing a roundabout at the Opaki &amp; Morningside Road intersection due to the proximity of the railway line and the high/low/low/low down 7m/10m Road at the point. In the Area Coordinator or Urban &amp; Cultural Services Manager would be happy to meet with the submitter to define what we are required to do and what we are required to do and what we are required to do.</p>			
09/06/2024	John	Smith	Planning Matters Ltd	1- Submitters request funding allocated towards Opaki and Waverley Road from their Road. Aural Road to the District boundary.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<p><b>Revised response for Proposals 1, 2 and 3 required here.</b></p> <p>Bridges are required when replacement is justified as per Waka Kotahi's criteria for investment. Currently we propose bridge upgrades based on condition assessment. Bridge no 128 on Opaki Road is programmed for replacement while the other two new bridges are not high on the priority list, therefore not considered for replacement in our LTP.</p>			

Extraordinary Council - Reports

Submit Sign Number	First Name	Last Name	Organisation	Subject/Issue	Proposal 1: Do you support Council's proposal to budget on average \$213,000 each year over the next ten years to fund the Environment and Sustainability Strategy?	Proposal 1: Comments	Proposal 2: Do you support Council's proposal to develop a District Business Park in 5 stages?	Proposal 2: Comments	Proposal 3: Do you support the Council's proposal to budget \$10.5 million (spread over 10 years) which will be used to undertake town centre upgrade projects in Palms, Waverley, Mordialloc, Opakaka and Eltham.	Proposal 3: Comments	Management Response	Accept	Reject	Request more info
114	Rob	Blacky		1- Would not like to see the Palms public toilets removed from their current location	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<b>Incident response for Proposals 1, 2 and 3 required here.</b> The Council is proposing to replace the current toilets on Egmont Street in Year 5 and will consider whether the current location is still suitable when new plans are being developed.			
115	Wayne	Hughson		1- Please consider the paving, traffic and the regulations that the public toilets in Palms are used. 2- Add a second public toilet on the Hunter Street building for better to stop it.			Option 1: Yes (Council's preference)				<b>Incident response for Proposal 2 required here.</b> The Council is proposing to replace the current toilets on Egmont Street in Year 5 and will consider whether the current location is still suitable when new plans are being developed.			
116	Leah	Roberts		Submitter is interested in understanding what currently happens to the waste collected from the voluntary green waste bins in South Taranaki District. Has read that food waste can be added to green waste since 2015. It says there are 3 providers for the kerb side collection. Who are they, where do they take it, and how much are they paid? Do you have any information on how much they collect? How will the Council cost out the investigation of its own composting facility as mentioned in the long term plan?							<b>Incident response for Proposal 1, 2 and 3 required here.</b> Greenware collected from the Council's opt-in, government residential kerbside collections goes to Personal Organics in Foston for composting. There is no set percentage or amount of food or organic waste that can be mixed with greenware, but it should be proportionally less than the amount of greenware in the bin. Greenfibre is the Council's contractor for kerbside collection and transfer station management and two other private commercial operators in the South Taranaki District service residents and businesses that do not qualify for the Council's kerbside service. The total value of the kerbside collection contract for the South Taranaki District is approximately \$2.2m per year. The three district councils are working collaboratively on a feasibility study and business case to build a Council-run composting scheme in the region within the next 3-5 years. There are a number of possible options for setting up a composting facility that would accept residential and commercial organic waste. This includes the possibility of working with private operators who are looking to establish such a facility here.			
117	Wendy	Archie and Chris	Woodwards	1- Submitters are not in favour of Council putting \$100,000 towards the Sculpture proposal. Contribution from Council between \$40,000 - \$20,000. 2- Art in Waverley similar to North Whangarei Art. 3- Waverley pool upgrade to include changing board or equipment for youth. 4- Development of the Waverley Town Ball would be more beneficial than a walkway to the beach. 5- Support an upgrade of the Waverley Beach Carpark road. 6- Walkway along the cliffs at the Waipipi beach to Waverley township and the importance of entry being on the way. 7- Seal Lower Okatake Road. 8- Would the Council to push aside development of Aotea Park.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<b>Incident response for Proposal 1, 2 and 3 required here.</b> 6. The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities. The Waverley Town Ball, including the park and public spaces, the area used by various sporting groups and the beach land, is all designated as Recreation Reserve. The use of the reserve is covered by the Reserves Act and decisions on the use of any parts of the reserve should be considered through the process of developing a Reserve Management Plan. A Reserve Management Plan is being developed, which will include Waverley Town Ball and will be consulted on with the Waverley community. 7. Any large scale mural art would probably need to be a community development project and done as part of the Town Centre Upgrade. The Arts Coordinator can support any artists who run a single-point project themselves but significant topics are beyond her scope. 8. There are no current plans for additional equipment at Waverley Pool. The next major expenditure there is to upgrade ageing plant. 9. No mention upgrade at Waverley Beach Camp is scheduled to be undertaken in year 2 of the LTP. 10. There is no budget allocated for seal extension in the LTP. All roads are inspected regularly and Lower Okatake Road will be inspected and any maintenance work identified will be programmed for budget. 11. The Palms Community Board has been working with staff to provide for shade areas at Aotea Park Final installation will be subject to getting all the funding secured.			
118	Stephen and Gemma	Comrie		1- Submitter would prefer the Waverley Town Ball walkway project to be a priority over the walkway to the beach. 2- No more than 70% of the cost of the new equipment should be paid for from the funds budgeted for the Waverley Town Centre master plan.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		<b>Incident response for Proposals 1, 2 and 3 required here.</b> The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities. The Waverley Town Ball, including the park and public spaces, the area used by various sporting groups and the beach land, is all designated as Recreation Reserve. The use of the reserve is covered by the Reserves Act and decisions on the use of any parts of the reserve should be considered through the process of developing a Reserve Management Plan. A Reserve Management Plan is being developed, which will include Waverley Town Ball and will be consulted on with the Waverley community.			
119	Wendy	Archie	Waverley Chamber of Commerce	1- Difficult to determine projects within Waverley until the outcome of the innovative streets initiative is known. 2- The Chamber would prioritise a vibrant mural over the tree sculpture. 3- The Chamber supports a part of the cost of the tree sculpture from the master plan budget but no more than \$20k. 4- Chamber is not persuaded that the town to beach pathway will be well used and would rather see funding for the Waverley Town Ball walkway. 5- Chamber supports that a Waverley beach walkway would be more valued than Waverley Beach to Waipipi beach to Woodlark River mouth.	Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)		Option 1: Yes (Council's preference)	It's difficult to determine estimated costs as there are no detailed plans - hard choices will need to be made about projects or the budget will need increasing.	<b>Incident response for Proposals 1, 2 and 3 required here.</b> The Town Centre Plans are high level documents and further consultation will be undertaken with the communities to confirm their priorities. The Waverley Town Ball, including the park and public spaces, the area used by various sporting groups and the beach land, is all designated as Recreation Reserve. The use of the reserve is covered by the Reserves Act and decisions on the use of any parts of the reserve should be considered through the process of developing a Reserve Management Plan. A Reserve Management Plan is being developed, which will include Waverley Town Ball and will be consulted on with the Waverley community.			
120	Wendy	Robson		Submitter requests that the three sea level bridges along Egmont Road from Aotea Road to the Starboard boundary are upgraded and the sea is widened.							<b>Incident response for Proposal 1, 2 and 3 required here.</b> Bridges are repaired when replacement is justified to give Wakaia's citizens for maintenance. Currently we are prioritising bridge upgrades based on condition assessment. Bridge no 128 on Egmont Road is currently being programmed for replacement with the other two sea level bridges are not high on the priority list. Workload combined for replacement in this LTP.
